Steel Strike Off; Murray Bows To Truman Threat

NEW YORK, Dec. 28 - Unnerved by Truman's threat to "use whatever laws there are on the books to prevent a strike," CIO Steelworkers president Philip Murray announced tonight that his Wage

the steel walkout scheduled for discovered that only the conven-

Action on Truman's request that the dispute be submitted to Truman's flagrant strikebreaking the Wage Stabilization Board has threat was interpreted as a signal been referred to the special union to retreat. Strike preparations in convention called for Jan. 3.

SAVING FACE

Murray's wage policy committee statement calling off the strike stated that "the convention is the only agency in the union which can make final answer to the president's request, since it has been specially called to deal with the present situation." This face-saving formula is intended to mask Murray's cowardly capitulation to Truman's strikebreaking ultimatum.

The wage policy committee had the authority to call a strike if no satisfactory agreement was reached before Jan. 1. In the past discriminatory system of regulathe committee would "authorize" Murray to order a walkout if he deemed it necessary. This time he was "instructed" to issue a strike call for midnight Dec. 31 by vote of the committee which declared the steel workers would not work "in the absence of discriminatory wage freeze. He mutually satisfactory contracts."

Coal Operators, Government Guilty of Another Atrocity; Lewis May Call "Holiday"

Another 119 coal miners have been murdered for profits. The men who died in the Dec. 21 explosion at the New Orient Mine No. 2 of the Chicago, Wilmington & Franklin Coal Co. near West Frankfort, Ill., were slain by the greed of the coal operators, aided and abetted by the capitalist government. It was murder as much as if these workers had been deliberately slaughtered with TNT, napalm bombs and poison gas.

What set off the explosion — a spark struck off by

NATIONALIZE THE MINES!

The mine disaster that turned Christmas wreaths into mourning wreaths at West Frankfort, Ill., raises anew and with frightful urgency the question of whether the private coal operators shall be permitted to go on with their wholesale murder of innocent working men.

Mining under the best conlitions is hazardous. But the callous indifference to work ers' safety consistently shown by the capitalist mine | d the federal bureau's findings. operators is responsible for the staggering toll of injuries and deaths that afflicts the coal industry every year. e metal on rock, the friction of machinery, spontaneous combustion — is a mystery, says Walter Eadie, State Mine Director in Illinois. But it's no mystery that there was enough deadly methane - what the miners call "marshgas" - to wreck most of the Back last July, two inspectors

of the Federal Bureau of Mines, W. R. Chick and C. L. South, had urged that the company seal up or ventilate abandoned workings in which huge pockets of gas were collecting. A federal mine inspection crew designated the mine "gassy" and reported the detection of more than 0.25 per

ent methane gas. But the company refused to comply with the mine bureau's recommendations. John R. Foster, mine superintendent, admitted, according to the St. Louis Post-Dispatch, that his company ignor-

be enormous in terms of made by the federal bureau, higher pay for the miners Secretary of the Interior Chap-Illinois or anybody else in Washington.

The Illinois Dept. Mines and alization would afford for Minerals does have power to the lives and limbs of the close down unsafe mines. This was not done because the state agency is nothing but a tool of the coal companies. The state inspectors, as late as Dec. 11, gave the mine a clean bill of health, although they must certainly have been aware of the conditions reported by the federal bureau.

Walter Eadie, state director of workers themselves, we can mines and minerals, "happens" be sure the workers would to have been the superintendent see to it that every safety of the New Orient Mine No. 2 at the time he was appointed to precaution and device is em- at the time ne was appointed his state post by "labor's friend," Democrat Gov. Adlai Stevenson. No more West Frankfort Stevenson was elected in 1948 in and Centralia atrocities! Na- | part on a promise to enforce mine safety after the 1947 Centralia disaster which snuffed out 111 lives during the Republican administration of Gov. Green.

There is speculation, at this writing, that John L. Lewis, who lew to the scene of the West Frankfort disaster, may call out the 450,000 members of the United Mine Workers for a memorial "holiday" of five or more days, similar to the walkout following the Centralia explosion. Several thousand miners have already, left the pits spontaneously in three states, most of them in Southern Illinois.

Lewis stated that if the members of Congress who have blocked effective mine-safety legisla-tion could "look into the faces of these terribly mangled mine workers who have died at Orient No. 2 . . . they might be induced to permit coal miners to continue to live"

In this, Lewis is gravely mistaken. These congressmen could look on scenes a thousand times more ghastly and not be moved. They are the political agents of the coal operators and the capitalist class as 'a whole. They are in office to protect profits, not safeguard workers' lives. That is why, year after year for decades, under Democrats or Republicans, the terrible mine slaughter and maining goes on. Not until labor has its own party and runs the government will effective mine-

TENTATIVE ACTION ON THE CIVIL RIGHTS FRONT

All who are informed on world affairs know the the United States today is the most undemocratic country still maintaining the outward democratic forms of government There is far more freedom in Britain and France today than in Lincoln's "new nation conceived in liberty;" not only in the formal legal sense but also in the general atmosphere; not only more freedom of discussion but also more freedom of thought. Even in Italy, whose people almost lost the memory of freedom in more than two decades of fascism, there is more respect for the right of opinion and free discussion than here.

The United States has enacted the most bar -. barous legislation and is brutally enforcing it mainly, at first, against the Communist Party. But reaction is not confined to the legal field. The dominant powers are waging a psychological war against free thought and dissenting opinion on a scale that goes far beyond the legal suppression - and prepares the ground for its intensification and expansion.

Reaction on Offensive

Ever since the beginning of the cold war, brutal and ignorant reaction has been on the offensive. The raging witch-hunt has invaded the schools and the trade unions, and so far has met little or no opposition. Indeed, the labor leaders who could easily be the next victims of a mounting reaction, as the tragic experience of Germany in the 30's so clearly demonstrated, gave at least left-handed support to the witch-hunt and rode on it in their internal fight with the Stalinists. Even the voice of American liberalism, when it has been heard at all, has been frightened, timid and weak. Opposition to the witch-hunt has been

The basic factor, paralyzing the traditional defenders of constitutional rights, has been their support of the administration's foreign policy, which is a policy of war and world conquest. Civil rights can hardly prosper under the domination of such a policy. The Truman administration, which directs both the foreign policy and its domestic implementation - the "loyalty" oaths and purges and the prosecutions - has had at least the virtue of greater consistency. Politicians never see any reason to pay for votes they can get for nothing. Support for the main line. pledged in advance, has robbed the modest requests for civil liberty of their bargaining

Nevertheless, a considerable and growing concern about the increasing invasion of constitutional rights is to be noted among wide circles of people. Various reasons motivate this concern. Some, who have nothing to do with radicalism. or any thought of it, consider it unwise to scrap the Constitution all at once. They fear excesses which could cause a revolutionary rebound and deal damaging blows to the social system which they support. Some of the sharpest and clearest expressions have been heard on the right.

Federal judges are counted, with good reason, among the most conservative representatives of the existing social order. It is rather ironical, therefore, that the first serious note of opposition to the unbridled disregard of constitutional rights and regulations came from a number of them. This has been particularly demonstrated in decisions overruling the lower courts in the matter of bail. In the general hysteria, these lower courts yielded to the demands of Truman's prosecutors

and fixed the bail of the indicted Communist Party leaders at unreasonable figures which they the higher courts have stated that exorbitant bail aroused so much indignation and that, of course, is precisely what Truman's the white supremacists are now of Jim Crow in 1952. prosecutors intended it to mean. We are glad making greater use of police vioto see the federal judges take this position, what- lence in order to terrorize the Neever their reasons may be.

First Good Signs

All the more to be welcomed are the recent signs of uneasiness and concern in circles which have traditionally stood for free speech and fair trial. The first good sign of a new awareness and intention to do something was the announcement of the formation a short while ago of the Emergency Civil Liberties Committee, headed by Professor Paul Lehman, Acting Chairman, and James Imbrie, Acting Secretary. Their declared intention to give active defense to all groups and individuals whose rights are violated by the mad dogs of reaction, regardless of their politica! opinions, was certainly an important step forward

Following that, the 13th CIO Convention condemned the Smith and McCarran Acts. The adopted resolution deplored the decision of the Supreme Court upholding the conviction of the Communist Party leaders under the Smith Act as "a grave blow to America's precious heritage of freedom of speech." I wouldn't give much for shot in cold blood in Opelousas, the enthusiasm and energy of the CIO leaders in La., for daring to go to court for implementing this resolution by an earnest fight in the next stage of developments. They left out the main thing: a demand for the release of the imprisoned Stalinists and an end to prosecutions at sea. under the Smith Act. But the adopted resolution has its own logic, and may prepare the way to more important action.

Now comes a welcome, if belated, declaration of Americans for Democratic Action that they will fight for the repeal of the Smith Act "because it proposes to prosecute people for what they think and say rather than what they do.' The ADA further says that it proposes, "together with the American Civil Liberties Union, the CIO, and other non-Communist organizations which have condemned the Smith Act, to fight for its repeal and for the reaffirmation by Congress of our basic freedoms." They also neglected to mention the most important point: the release of the imprisoned Stalinists.

All these moves are timid and tentative, but they go in the right direction. The ADA, like the others, would limit its cooperation to "non-Communist organizations," That's up to them, I suppose. We can't object to people choosing their associates and working for a good cause in their own way and in their own field. But they will not get very far, or do very much for civil rights, sanction to racial murders." until they face the real issue of the witch-hunt

That is open and active defense of Stalinists strongest action of the federal who - in the given circumstances of the cold government can prevent the legal war - are the first and main victims. The murder of a great many more Ne-Emergency Civil Liberties Committee, to its groes in the near future." credit, has taken a clear position on this crucial. But the federal government point. There is not much value in talking about took no action whatever. Not defending civil rights unless one is willing to one killer with a cop's badge was defend the victims of their violation. gro people and keep them "in their place."

Nobody knows exactly how

many Negroes were murdered by cops in 1951; only figures of "formal" lynchings are compiled. But what is known points to a steep rise in such killings, in the North as well as the South. The following are only a few of the better publicized cases:

Henry Fields and Edwin Gonzales, a Puerto Rican, shot in cold blood in New York City; Robert Kelly, shot in cold blood in Trenton; Samuel Shepherd, shot in cold blood (along with Walter Irvin) in Lake County, Fla., on their way to a hearing for a new trial ordered by the U.S. Supreme Court in the Groveland "rane" frameup; John Lester Mitchell, protection of his right to register and vote; William Harvey, shot in cold blood by a ship's officer

Those were killings. In addition, there were thousands of cases where Negroes were brutally beaten and arrested by police only because of the color of their skin.

"LEGAL MURDER"

The United Auto Workers In- was making in "reducing" segreternational Executive Board correctly described the situation as Negro servicemen were still Jim "an intensification of terroristic aggression against Negroes by and the National Association for officers charged with upholding the Advancement of Colored Peoand enforcement of the law." Twenty members of the Psychology Department of the City College of New York noted that the pattern for denying Negroes their constitutional rights had shifted from mob violence "to the more subtle forms of quasi-legal executions or violence at the hands of 'law enforcement' officers,' thus giving "the aura of official

strikes in the latter part of the year, the Douglas, Wright and Borg-Warner strikes, showed the explosive pressure of the ranks against the decline in living and working standards. Other striking workers, in Westinghouse and on the New York docks, challenged the government's "stabilization" hoax. While, in all of these strikes, other issues played a big role, the central effort of the workers has been to break the wage-freeze and blaze the trail for a new round of wage increases to try to catch up with mounting

The wage-freeze has not as et been broken, and the New Year starts with the greatest ef-

Anti-Racist Defense Guards

From all parts of the country and all sections of the Negro, labor and liberal movements, demands are being 651. raised for action by the Truman administration to apprehend and punish the bomb-killers of Harry T. Moore, Florida official of the National Association for the Advancement of Colored People.

These demands are necessary and correct. If the forces of Ku Kluxism and fascist reaction can get away unpunished for this murder, no Negro leader, no labor or- mission. He led the recent fight mary point in the long document ganizer, no liberal spokesman in the South will feel safe for a city FEPC law which won and every progressive cause in the country will suffer a

But such demands alone are inadequate. The government has received them before in similar outrages; sometimes it goes through the motions of making an "investigation"; invariably, nothing effective or concrete is ac-

That is why two other measures are dictated by the Flint UAW region is rated highpresent situation: 1. The formation of defense guards. ly. 2. The organization of mass demonstrations expressing the GOOD RECORD indignation and fury of the American people.

When Jewish synagogues were first bombed in Miami, Jewish veterans spontaneously proposed the creation of defense guards to protect their buildings of worship. Their is responsive to the wishes of the leaders squelched the idea, expressing confidence in the authorities. Their confidence has proved to be sadly mis-

The Negro people have even less reason to put a shred of confidence in the police. In the Groveland frameup, which Harry T. Moore was killed for opposing, it was the head of the police who personally shot down two manacled Negro youth, killing one and almost killing the other; the state authorities patted him on the back. To expect the police to protect Negroes would be as foolish as having expected Hitler to protect Jews.

The labor movement, the Negro people and the Jewish people have common interests in stopping the reign of terror. They can and should defend those common interests by banding together and forming defense guards to actively protect their leaders, and their right to live and the convention in April 1951 till struggle for a better life. Anything less than this will only invite a worsening of the status quo.

Simultaneously, the labor, Negro and Jewish groups or anti-Reuther, I am for a union throughout the country should back up their demands for program." federal action against the terrorists by calling mass demonstrations in every big city to serve notice on the government, the killers wearing cops' badges and the throwers of the bomb's that the American people will tolerate no influenced many officials who at more racist violence and that they will not rest until it is stopped and all who are responsible for it are properly punished for their crimes.

Bring Korea Gls Home!

Whatever else may result from the truce talks at Panmunjom, these negotiations have produced incontestable evidence that the Korean war is a CIVIL WAR in which Koreans, both North and South, are fighting for national liberation and national unification against the in the side of the Reutherites our opposition," armed intervention of Washington and its puppet Syng- since the proposed Ford Pension man Rhee regime.

The factual evidence to which we refer, is contained in the exchange of prisoner lists, in the "discrepancies" each side has found in the lists drawn up by the other side, and in the ensuing explanations. Involved are some 100,000 South Koreans, admittedly taken by both sides as prisoners of war, but no longer listed as such by either side. And for diametrically opposite reasons.

The lists submitted by the Chinese fail to account for some 40,000 to 50,000 South Koreans. Taken prisoners, these men have been "indoctrinated." They were then trusted with arms and sent to the front lines. Adm. Libby says that these South Korean soldiers have seen "front line duty with the 6th, 7th and 8th Corps of the North Korean Army." There was evidently no hesitation in arming these ex-prisoners and also in incorporating them by the thousands in the North Korean crack military formations.

Now observe the glaring contrast on the U.S. side. Prisoner lists originally submitted by the U.S. command included "more than 37,000 South Koreans originally held in the stockades with Chinese and North Korean soldiers" (N.Y. Times Dec. 23). There is no claim that these prisoners had been armed and are now fighting for Syngman Rhee. Nothing could be further from the thoughts of the American militarists than to trust these men, let alone place arms in their hands again.

Instead they have simply been "screened out" at the last moment and "reclassified." No explanation has been forthcoming for this sudden change in their status. Was it in order to hand them over for "indoctrination" to Syngman Rhee's execution squads? The U.S. command has done this before in Korea and is unquestionably ready

At all events, these 100,000 South Koreans, of whom roughly one-half were captured by each side, provide striking proof as to which side the mass of the Korean people really support.

The question naturally arises: what purpose can a truce serve in Korea? Suppose a foreign power had intervened on the side of the slavocracy in our own Civil war, as so many among the British ruling circles advocated at the time. Would a truce, then, have been acceptable to the American people? On the contrary, the universal de- day, the merchant capitalists. They later stepped mand would have been for the foreign interventionists to in and picked up the ripe fruit after others had get out and stay out.

This same demand applies with even greater force | The Cowardice of the Capitalist Class in the case of Korea where the dividing line between the North and the South is wholly artificial, drawn not by the Korean people themselves, but behind their backs by Roosevelt and Stalin at Yalta. Let there be an end to the atrocity of Korea. Withdraw the U.S. troops!

National UAW Problems Pose SPECIAL ISSUE OF FI Unity Need on Program in Flint

By Emmett Moore

Carter has been on the Flint

City Commission for several group. years. From this vantage point he has conducted several progresive campaigns which have identified him as the outstanding labor representative on the comfor him the full support of the Negro community. He was in the forefront of the struggle for public housing and against increases in the bus fare. These actions, independent of his union position, won him a large following in the UAW. But it must also be recorded that his administration of the

Many unionists consider Carter's administration to be the best in the history of the region. He membership. With little or no pressure he invariably reacts miand wage disputes. With mounting layoffs, he activated "bread and butter" committees in each local. These committees organized the largest protest mass meeting in several years in behalf of the 12,000 unemployed in Flint.

Reuther's program is the greatthe present day Carter has straddled this issue. He has stated repeatedly, "I am not pro-Reuther

ANALYZES FINAL CRISIS OF WORLD CAPITALISM

By George Clarke

"The final crisis of world capitalism" is the extremely appropriate title of the sixty-four page November-December issue of Fourth International, now off the press. The

resolutions and reports of the Fourth International to which the contents of this special number but to all UAW workers in the are entirely devoted, charts the and Engels on the final outcome social geography of this crisis support for the program will from its sources and trends to its and labor. probable outcome. Representatives of the Trot-

kvist movement from some thirty countries who gathered in Swit zerland last summer considered the problems of a world in the throes of transformation. The system of capitalism has entered a stage of irreversible decline. One-fourth of the earth torn out of the realm of exploitation for rofit. Colonial revolutions spreading from continent to continent. encompassing the vast majority of the human race, undermining position to Reuther can be built. the once powerful empires, shaking the imperialist countries to

were in effect those which arose from the growing actuality of the 100-year old prediction of Marx of the struggle between capital

GREAT CONTRIBUTION

The great contribution of this Congress — as the reader of Fourth International will quickly recognize -was that it pierced the fog of confusion, uncertainty and fear which inevitable surrounds such titanic class battles. It dug into the social roots of the two camps which face one another from the opposite sides of the "cold war." It analyzed the prinipal economic and political forces driving world capitalism into a new global conflict. It sharply contrasted the nature of the wars in the past with the one that is mpending. Then an imperialist conflict carried forth on the back of a prostrated, deceived workers' movement. Tomorrow, unless stopped by the world-wide revolutionary tide itself, a counterrevolutionary crusade by reaconary imperialism quickly beoming an international civil war.

The eruption of the Chinese Revolution, the Korean war, the smoldering social volcano in the Middle East - all of these events find their place in the masterful analysis presented by the Fourth International Congress. They do not appear as separate, disturbing convulsions, but as part of the stream of history now rushing toward socialism.

ROLE OF STALINISM

The role and function of Stalinism in this process is made unambiguously clear. Clarified in the light of the events in Yugoslavia and China it is revealed as a temporary formation born in the stagnant waters of defeat and reaction and not as a new historic force.

The resolutions and reports emonstrate the progressive naure of the social transformations n Eastern Europe and of the national liberation of China. But they also indicate how the very breakdown of capitalism, its replacement by new social forms, is not the source of new strength for the Soviet bureaucracy, contrary to appearances. It is the basis of an irreparable crisis in Stalinism which parallels and is produced by the crisis of capital-

These are but the broad outlines of the problems which came under the purview of the Congress and are dealt with in the current number of the magazine. Lack of space prevents us from elaborating its contents any further. We can only indicate how rewarding a study awaits the eader of the November-December

pressure he invariably reacts militantly. Carter has authorized a number of strikes over speedup and wage disputes. With mount-

"clique" maneuver in the "game REAL SIGNIFICANCE The launching of an Independent Labor Party would be

have to be based on these mass

the most gigantic step forward in the history of the American labor movement. It would herald the approach of a deepgoing social crisis. An independent labor party would inevitably lead to a struggle for power between capital and labor. It would demolish the fake two-party system of American politics and substitute a genuine two-party conflict based on class interests. It would eliminate for ever the political shell game that now is cloaked in the deception

If there is anything upon which the labor bureaucrats and the Stalinists agree it is on their opposition to the formation of a genuine Independent Labor Party. The real purpose for the forma-

issue of Fourth International.

-Sam Adams and the American Revolution: 8—

THE MERCHANTS DESERT

By Harry Frankel

The big merchants of New England began to shy away from the revolutionary movement right after the people showed their power in the Stamp Act demonstrations of 1765. By 1770, this retreat of the merchants had become a rout.

They had barely been dragged into the boycott novement of 1767-70, in protest against the Townshend taxes. Now however, the British had been compelled to repeal the Townshend Acts, and the merchant's left the movement, many of hm never to return. The New York merchants left first, smashing the non-importation agreement, and the merchants throughout the colonies

Marxists have always called the American Revolution a "capitalist" revolution. This means that the Revolution put the American capitalist class in power, and accomplished many things that the capitalist class needed to have done. It unified the colonies, ended all of the restrictions on the growth of capitalism, set up a government that would protect capitalist property, and

But when we call this revolution a capitalist revolution, that does not mean that the capitalsts themselves led this revolution, or even that a najority of the capitalist class supported it. As a matter of fact, the revolution was mainly made by other classes. It was even made against the will of the majority of the capitalist class of that uprooted the tree.

If we glance at the history of other capitalist revolutions, we see much the same line of development. For example, in the French Revolution, the capitalist class, early in the game, was so frightened by the popular upheaval that it tried to hold the Revolution back. Most of the wealthiest and powerful capitalists and their spokesmen went over to the counter-revolution. It should not surprise us to find that, in the American Revolution, the capitalist class was too timid, too conservative, too fearful of the masses, to take the lead. The capitalist revolution triumphed despite the cowardice and treachery of the capitalists.

Most of the merchant class deserted Sam Adams and the radicals in 1770. Only a very few radical merchants remained supporting them. Later on, when the decisive battles approached and the radicals appeared to have great strength, a part of the merchant class, a minority part, came back into the fight. But a new movement and a new leadership had been built in the years between.

When the merchants deserted the struggle in this period, Adams remarked that they had held out longer than he had expected, but that in the future, the movement would have to base itself upon the workers and farmers, or, as he phrased "those two venerable orders styled mechanics and husbandmen."

Among the merchant-deserters of the opposition movement was the famous John Hancock. Hancock was a very wealthy young merchant, one of the richest in the colonies, who got his money in an inheritance from a childless uncle. Sam Adams picked him up in the course of his work among the younger generation; Adams delved continually among the youth, and brought up a whole cadre of young revolutionists with his own hand.

Hancock was an asset to the radicals, being wealthy, and at the same time quite popular. But he was a source of constant anxiety to Sam Adams. He was inordinately vain, a limelight seeker, the very opposite of Adams. He was uncertain in his politics, a strutting popinjay who deserted in the hard days, a self-seeker who placed personal whims above the needs of the movement. Adams had to deal with Hancock with the greatest of tact, in order to get some good out of him.

It is one of the rank injustices of history, that Hancock's name is known today to every schoolboy, while that of his teacher and leader, who made something of a man of him, and gave him his place in history, is covered over with obscurity.

In the hard days of 1770-72, Hancock deserted and split the radical camp, taking with him a "moderate" wing, which he led in a number of battles against Adams. The radicals found themselves reduced to a small grouping. Sam Adams himself had great difficulty winning his seat in the legislature. The radical wing lost its predominant position in almost all governmental bodies, outside of the Boston town meeting, and even here its position was shaky.

The "Lull" in the Radical Movement

This is the period of the so-called "lull" in the revolutionary movement, caused by the desertion of the merchants. Most capitalist historians, finding that nothing spectacular occurred during this two-year period, tend to skip over it. This is an error. During these years, processes which went on beneath the surface, although not spectacular, were essential for the later success of the Revo-

It was pointed out earlier that Sam Adams attempted to lead the opposition movement into an insurrection against Britain in the latter part of 1768, at the time of the Massachusetts Convention, and that he found this impossible and had to back down. The year of the "lull" were the very years during which Adams did his great work to supply the missing elements, the absence of which had prevented revolution in 1768.

He worked to raise the popular understanding, particularly among the farmers, to build a mass revolutionary organization independent of the weak-kneed merchants, and to link up the Massachusetts opposition with a nationwide move-

The revolutionary press widened its circulation. The Boston Gazette, Adams' chief newspaper, had grown to over 2,000 circulation. And, in 1770, a new radical paper, the Massachusetts Spy, was founded, and soon sold about 3,500 copies of each issue. These circulations were immense in colonial times. Before the crisis, the four papers in Boston had an average circulation of about 600 each.

These papers, and particularly the new Massachusetts Spy, penetrated the farming regions, and educated the people in radical principles. Revolutions do not consist exclusively of spec-

tacular events, as most historians seem to think. This slow educational process, going on over a period of years, stored up the future power of e Revolution.

Sam Adams As a Journalist

The most popular and able journalist of the revolutionary movement was Sam Adams. His printed words had a great capacity to teach and

He was capable of a cold ferocity when it suited the occasion. Governor Bernard, the top crown official in the colony, would wince when he read Sam Adams. "Every dip of his pen," he wailed, "stung like a horned snake." Another leading Tory, speaking of Adams' famous articles on the Boston Massacre, said: "And bitter reading they were, for they were Wrote with a Pen dipped in the Gall of Asps.'

Adams wrote articles that convinced by their iron logic, by the manner in which they surrounded the matter under discussion from all sides. By bringing to bear arguments from all possible angles, he instilled in the reader an abiding conviction that the radical cause was just. His pen could also be "genteel and artful," as his cousin John Adams testified.

In addition, Sam Adams was famed as an excellent editor, adept at cutting, revising, polishing. A young follower, Josiah Quincy, said of many articles, petitions, resolutions, etc., that they had been "smoothed over with the oily brush of Sam Adams."

There is a proverb: "The pen is mightier than the sword." This should not be taken too literally in all cases. But, during this time of preparation, during the "slow" years when the conciliators and Tories held the upper hand, Sam Adams' pen did work that would have been impossible for ten thousand swords. It made the revolution in the minds of men. When that kind of a revolution is made, the rest follows naturally. But a revolution of the sword without the pen, without the conviction in the minds of men, is

an adventure, doomed to failure. During these years, Sam Adams was also busy as an organizer, not only as a journalist. He worked to assemble the best radicals into a solid organization, and to extend that organization throughout New England and the other colonies. His success in this endeavor was of equal im-

portance to his journalistic success. (Next Week: The New Party.) can citizenship: "I want to sever all relationships right now. I want no waiting."

The statement was made by Lee Prettyman in the offices of the Cleveland Call and Post, where he displayed a letter addressed to the United States Attorney General in Washington and to the Bureau of Immigration and Naturalization, Federal Building, Cleveland.

Explaining his action, Prettyman said: "The constitution was never written for Negroes of the United States. The civil rights amendment eases but does not remedy the well-worn phrase 'The Negro Problem.' I was born a Negro, and as a Negro I am automatically relegated to secondclass citizenship."

Identifying himself with the World Citizens group organized in Paris by Garry Davis, a white American, Prettyman said they stand for "the abolition of war, for the elimination of segregation and discrimination, and for real progress.'

Not many people will dispute the young man's statement of the status of the Negro in the United States, nor his desire for a world free of wars, discrimination and obstacles to progress. His contempt for the "blessings of American democracy" may provide a jolt for the smug complacency of those who consider this country the beacon of the "free world."

But Prettyman's proposed course of action will neither change the status of the Negro in America, nor even that of the young man attempting to escape it. For one thing, the mass of Negro workers and their families are in no position to follow the example of Prettyman and head for Paris. Most of them can't even leave the South, let alone North America.

But more important is the fact that there is no road to freedom and progress other than through struggle, and Prettyman's course is an attempt to flee from the struggle. The battle against Jim Crow must be fought and won right . not profit.

here in America. This is the source of the disease and this is where it must be cured.

The effective way to oppose second-class citizenship is not to surrender America to the capitalist white supremacists who rule it, but to challenge that rule, to organize for struggle the masses of Negroes together with the white workers who are also victims of the common enemy.

Prettyman and others, Negro and white, who are overwhelmed by the apparent might of the American ruling class and feel powerless to struggle against it, should examine more carefully the sources of that might - and they'll uncover the weakness that it conceals. They will see that the real strength of America is its powerful productive forces which are constantly beating against the confining walls of the economic system that decrees there shall be no production, no progress, unless the capitalist minority who own the means of production can maintain their profits and privileges.

But these powerful productive forces, and the working class that has grown to tremendous proportions with them, cannot be confined much longer. Large sections of world capitalism have already collapsed. In Europe, South America and Africa, capitalist rule is maintained only by the arms and aid of the last stronghold of the capitalist system, the United States. In Asia we see the masses taking matters into their own hands to destroy the old society and build a new one.

But it is here at home, in America, that we can see the fatal weakness of world capitalism. It is upon this country that world capitalism depends for the strength to maintain itself throughout the world. But it can only be done at the expense of the American working class by driving down their standard of living and removing the last vestiges of political democracy and freedom.

And that is what spells its doom. That is what will finally rouse the American working class the Social Order." When the apgiant to shake off its shackles - its prejudices that keep it divided, its misleaders and traitors - and to take its destiny in its own hands to lature, red-baiters put a copy of build a socialist society of production for use,

Where Will It All End?

Every year at this time the post office is swamped with applications for temporary work. The Christmas rush means more jobs for people who can qualify to help with postal work. This year the qualifications for employment have been broadened in such a manner as to sound a warning bell for everybody concerned with preserving civil liberties. Perhaps it sounds innocent: "postal inspectors in Detroit finished the first week of a drive to prevent undesirables from getting on the post-office's payroll." Undesirables that can cover a lot of territory.

Two persons being prosecuted for lying and concealing information on application forms are young teachers. They claimed to be unemployed while actually they were employed by the city. This makes them eligible for five-year prison terms and \$10,000 fines. On the face of it they have done somthing illegal — they lied, they were caught, they are going to be punished. But their punishment, as prescribed by law, is greater than that given for stealing mail.

Two others who will be put on trial for concealing information are a man who is facing a narcotics charge and another who is facing a nonsupport warrant. It was illegal for them to apply for work because they will be put on trial for crimes utterly unconnected with postal work, crimes for which they have not yet been found guilty. The post office authorities have already decided their guilt - without benefit of trial or jury. Any ex-law breaker, any potential law-

say the postal authorities. Two others will be tried because they had violated their probation at Recorder's Court and had the audacity to want a job while doing so. Not only will they miss out on the job but they have the prospect of five years in prison and a fine of \$10,000 staring them in the face. It would seem that criminals had better keep on robbing and killing to make a living-efforts to get honest em-

ployment bring them only fines and imprisonment So far 11 persons have been held for concealing "facts of their personal history." That's another far-reaching phrase that could be interpreted to mean anything the postal authorities want it to mean. What could be "undesirable" in your "facts of personal history"? Have you run thru a red light? Did you get a ticket for walking on the grass in the public park? Have you been complaining about the new tax laws? Did you attend a public meeting of some socialist party? The government thinks all of these things are undesirable. Where is the line going to be drawn between one undesirable fact and another?

You haven't got a government job? What's all sity heads hypocritically claim this got to do with you or your neighbor or the that Wiggins' dismissal had nothguy down the street that you say hello to every morning? Just think this over: The postal au- but that he had been dismissed freedom itself is at stake here. thorities have already checked through and hired their needed 10,000 extra workers. They are ly contradicted by the faculty of now cheking the application forms of all 25,000 who applied for temporary employment - regardless of whether they were hired or not! Where does that leave their avowed reason for | ing. this campaign - that they were doing it just to "prevent undesirables" from getting on the post office payroll? It leaves their reasons in the same place that the government officials in Washington park theirs when they fire and in-Americans in the Bill of Rights and the Consti-

Too often the startling facts of police state methods that are being employed today just seem to be only that — startling. Many times they

First U.S. Witch Hunt

By John F. Petrone

The Bill of Rights went into effect on Dec. 15, 1791. Less than seven years later, in the summer of 1798, Congress controlled by the conservative Federalist party, set out to nullify and destroy those rights with the adoption of the Alien and Sedition Acts. This, the first federal witch hunt in the United States, affords so many parallels with the current government-inspired assaults on civil liberties that the American people would benefit considerably from becoming better acquainted with its history and lessons. The publication of a new book on this subject, probably the most complete treatment yet printed, is therefore a welcome thing, both to fighters against the witch hunt and students of American history. (CRISIS IN FREEDOM: The Alien and Sedition Acts, by John C. Miller. Little, Brown, 1951, 253 pp.)

In 1798 the Federalists seized on the diplomatic difficulties they were having with the revolutionary French government, whose power was spreading all over Europe, in order to justify the enactment of four repressive laws, ostensibly aimed against aliens and sedition, but actually designed to gag and cripple their political opponents, the Republicans headed by Vice-President Thomas Jefferson. At the same time the Federalists, headed by President John Adams and Alexander Hamilton, began to prepare for war against the French, whose democratic tendencies they were determined to prevent from spreading in the

Then, as now, the government pushed through thought-control laws to perpetuate the rule of the party in power and to wipe out opposition to reactionary foreign policies and war preparations. Then, as now, they hid behind the pretext of a "war danger" to whip up hysteria against their American opponents as agents of a foreign power, to hound the foreign-born (most of whom supported the Republicans), to suppress critical newspapers, to imprison those who refused to be gagged. Even opposition to the new laws on the grounds of civil liberties was regarded as a sign of subversion, a member of Congress was imprisoned, and repressive action was considered against the entire Virginia legislature and the governor of Kentucky. Madison correctly observed that if the Sedition Act had been in effect during the American Revolution, the U.S. might the strike. There were several have remained "miserable colonies, groaning under a foreign yoke."

In the end the Federalist witch hunt was defeated, the Alien and Sedition Acts playing an important part in their loss of power in the election of 1800. When Jefferson was elected president he allowed the acts to lapse and released the department where so-called meeting was a resounding success, victims still in prison. Although the Republicans committed some tactical blunders in the way they fought the acts, the people never favored these measures. (Miller has no proof whatever for implying that the American people "consented" to them.) Opposition grew steadily, especially after it became clear that the French were not seeking the grievance procedure outlined war with the U.S. at all. (The Federalists wanted war, but delayed it in the hope that the French would start it - delayed it until they lost the opportunity.) In 1798 the Republicans had the support of less than 20 newspapers out of 200; two years later Jefferson was backed by more than 50 papers.

"Lock Jaw Federalism," as they called the gag acts, provided valuable ammunition for the Republicans, but it was not the civil liberties issue alone that led to the downfall of the Federalists. Miller quotes Jefferson as making an acute observation in November, 1798: "The disease of the imagination will pass over, because the patients are essentially Republicans. Indeed, the Doctor is now on his way to cure it, in the guise of a tax gatherer." This was a reference to the costs of the Federalists' war preparations, which led to new taxes on houses, slaves and land, a stamp duty and higher customs duties. "The burden of these taxes created more resentment against the Federalists than did the Alien and Sedition Acts," Miller briefly states. It is unfortunate that he did terms of the agreement, the comnot devote more space and research to this aspect of the problem, which has special application to the present situation. People who despair today about the chances of stopping the witch hunters should never forget that the government's anti-labor economic policies are going to produce a powerful resistance to the regime that will effectively promote the defeat of the thought-

CAUGHT BY SURPRISE

The union leaders now tried to sell the back-to-work movement to the Shop Steward meeting. This proposal caught the stewards by surprise. The threats of Reuther and Mazey were repeated: The International was branding the strike an "outlaw;" the status of the 26 must be left up to arbitration; the international would take over the local and appoint an administrator over the locals funds, thus starying the strikers out; the International would campaign against the strikers on radio and television, isolating them from all sources of union support; rival mass meetings would be called;

Despite these threats the steward meeting voted against Reuther's proposal. The stewards pointed out that to lose one case of the 26 was to lay the foundation for destruction of the entire shop steward system. One firing would intimidate all the stewards.

Reuther and Mazey's strikereaking was completed at a mass meeting. However, instead of allowing the political prisoners better treatment, it ordered harsher them than for ordinary prisoners. Within ten months after her arrest she had lost 371/2 pounds and looked like a living skeleton. Correspondence with her is very weeks whenever it dealt with an mportant legal move. Recently these conditions have been mitigated by protests.

NATIONAL TOUR

Discussing the iron curtain the authorities have attempted to draw around this civil liberties case, Mr. Lynn said that the defense committee is sending him on a national speaking tour. He will speak in Toledo Jan. 3; University of Chicago Jan. 5 and 6; University of Minnesota Jan. 8

Deadline for Militant

The deadline for articles and ads for The Militant is the Tuesday before the date of publication.

regular cell, the window was and 9; University of Wisconsin Ohio Jan. 15; Yale Jan. 18; West-22;; Washington, D.C. Jan. 24; Pittsburgh Jan. 25; Buffalo Jan. 27; Syracuse Jan. 29.

In closing Mr. Lynn said that readers of the Militant could help in two ways. First by sending contributions to Ruth Reynolds Defense Committee, c/o Julius Eichel 769 St. Mark's Ave., Brooklyn 13, N. Y. Second, by "letting the truth be known," by spreading word of this case and thus defeating the government's campaign to hush up the brazen frame-up in Puerto Rico.
