PROHIBITON IN KANSAS.

What is it doing for you?

Organized labor in the state of New York are voting on the proposition to follow the example of the Western Labor Union and go into politics. There will be great political surprises this fall.

This is how prohibition works in most places in Kansas. These saloons are worse than licensed or open ones, as they depend wholly on an understanding with the officers, who violate their oaths to permit the traffic consequently they pay no attention to minors drinking. Men go into the traffic because there is a PROFIT in it. Take away the profit there is a PROFIT in it. Take away the profit of phones, and ten cent telegrams are all near possibilities under an enlightened and compact postal system."—Hon. John Wanamaker, ex-Postmaster General of the United States.

Did you ever hear of laws being declared unconstitutional because workingmen objected to their provisions? You have heard of them being kicked out of court because the rich did not like them, haven't you? Funny how the machine works, isn't it?

DERSTAND what they want.

The Rhode Island street car men struck to force the companies to obey the state law for ten hours work. The city and state officials used all the police, militia and every other weapon to support the street car company to break the law and down the workers. Who are anarchists? Who defies the law? The corporations and their hirelings in office.

There is no question about the state officials of Kansas being law-abiding citizens. They are sworn to uphold the state constitution which says liquors shall not be made or sold in the state—and they not only know that saloons run open almost everywhere, but they patronize them. On a recent junketing tour in a special car they had a fine saloon fitted up and—well they are not perjurers or anarchists—just law-abiding, patriotic citizens whose loyalty cannot be questioned!

Isn't it queer that when workingmen strike zens whose loyalty cannot be questioned!

Isn't it queer that when workingmen strike they are "anarchists and criminals," but when they submit like whipped dogs to the conditions of the masters they are "loyal, patriotic Americans?" Another thing that seems they are "loyal, patriotic and the patriot tions of the masters they are "loyal, patriotic Americans?" Another thing that seems strange—that in places where nothing but democrat and republican votes have ever been cast—the men who cast them are "law-less and anarchists" when they strike. Why don't the old parties teach their voters not to be anarchists?

There should be but ONE UNION LABEL in the nation. It should cover all organized labor. When labor anywhere were attacked it would be an attack on labor everywhere. Such a union would be invincible. It could compel recognition of its members in the most remote localities. It would teach labor the lesson of government, that it will be qualified to conduct the industries of the nation when labor shall longer refuse to support a drone.

Some Socialists may, just as they may advocate prohibition, but no statement of that character is in any of their platforms or demands. It would be nothing new to advocate repudiation, as the republican party repudiated the ownership of slaves and refused to recognize the debts made by the southerners in defense of them. Our forefathers repudiated the ownership of them. the debts made by the southerners in defense of them. Our forefathers repudiated the ownership of this country by King George, though he was legally possessed of the same. All who study it know that the national debt has been fastened on the people by fraud and crime, but its settlement will have to wait until the books are balanced on the day of reckoning. Fort de France, May 31.—Bitter political strife raged in Martinique balore the disaster. There was a distinct cleavage between whites, raulatioes and blacks. Social solidity was wanting. The colony was in a degraded condition and political agitators spent large sums of public money. The victors seried "the spoils" by right. I desire to call your attention to the evidence in the above that the writer of it and others who hold the same views, are self-confessed criminals. While trying to prejudice the public against Socialism they furnish the proof of their own debased character. Now, the island was under the rule of France, its officials who were stealing the public money and reducing the people "to a degraded condition", were supporters of the present system AND NOT SOCIALISTS. The Socialists were not in control and could not therefore have been in any wise responsible for the condition that made the people discontented. The other feilows were in control and DID produce those conditions and were therefore responsible for all the evils that flowed from them, directly and indirectly. It further appears that the thieves and robbers, who were opposed to the Socialist agitators, and were doing all this robbery, did not want the people to be discontented. The Socialists did want the people to be discontented with a "degraded condition", and they were right. All people should be discontented to have robbers rule over them, as that class here confess they were. So that this, instead of being evidence against the Socialist, rightly understood, is the best of testimony to their uprightness and their defense of the weak against the robber class of politicians who ruled the tsland. Think of blaming Socialists for the conditions made by the robbery of those who condemn Socialism! But such is the logic that is used. And the thoughtless take

In what way will Socialism benefit the women?-J. T. Hincheliff, St. Louis, Mo.

By taking away all the economic burdens of life; by removing want or fear of want; by making them independent; by abolishing the classes that produce the vanity, the rivalry and the slavery to fad, fashion and folly. Under Socialism the women will receive the same compen-sation as men for any labor suited to their sex. In the domestic circle, the greater part of the burden will be lifted from them and put in every essential knowledge for the older ones preparing them for their place in the national industries, to become honored and useful citi-zens; that will give them entertainment and time to enjoy them, instead of making domestic slaves of themselves as at present; it will do for women as much or more than for men. Why should an inventor have to work harder than other men to get all the good things of life? Why would he want to get ahead (finan-cially) of other men when it would add no possible pleasure or development to life? Under Socialism all men can have all the good things of life and not make life a continual struggle. of hie and not make life a continual struggle, either. The idea that the accumulation of riches is the object of life or that it develops any of the virtues of nature, is absurd.

The fine workmen, artist, scaiptor will fol-

Others who cannot do such fine work will have to do some other useful work, the best they can, that the fine workman can do his. All will enjoy the labor of all. Skill will receive all the pleasures of life—today it does not. But it can do this and not deny to other workers the full enjoyment of what they also desire. Under private ownership this cannot be. Under Social ism it will be.

Is it a panacea for all the great evils of human society? Is it a constructive art? Is it a philosophy of life, a future stage of culture and civilization, a class struggle? Why are there no two authorities agreeing on the definition of the term Socialism. Why is the Socialistic movement all over the world split up in so many parties, factions and sects bitterly antagonizing each other? These and similar questions involuntarily suggest themselves to the thoughtful readers of any Socialistic publication. The key to the solution of the weighty problems involved in the indicated questions consists in the immense complexity and many-sidedness of Socialism.

opinion, any sincere conviction has to be met in the spirit of broad tolerance and tested in the light of Reason and Knowledge.

In this spirit the writer of these lines presents to the kind readers a brile summary of his views on some aspects of Socialism and its mission.

AS A PHILOSOPHY OF LIFE Socialism is the modern expression of the principle of RACE-CONSCIOUSNESS (as opposed to Anarchism), based on the conviction that the interests of each man, woman and child are best served by subjection to the common interests of all mankind. This plain principle is the true foundation of International Socialism.

SOCIALISM in the broadest sense of the term, IS THE RECOGNITION OF THE PERFECT SOLIDARITY OF THE INTEREST OF ALL

SOCIALISM in the broadest sense of the term, is THE RECOGNITION OF THE PERFECT SOLIDARITY OF THE INTEREST OF ALL MANKIND. THE interests of the proletariat and the entire buman race are identical. The CLASS CONSCIOUSNESS of the tollers, rightly understood, is nothing clse but THE MODERN EXPRESSION of RACE-CON. SCIOUSNESS, the HIGHEST IDEAL of HUMANITY. Its aim consists to the emancipation of mankind from the despote sway of economic power of one class over the other. The classical call of the communist manifests; "Proletarians of all countries unite!" is the call for the consolidation of the overwhelming majority of the human race against a ridiculously small minority of exploits.

The Appeal is trying to interest the people in the subject of Socialism. It is leaving no stone unturned to do it. It uses every means to catch their attention and make a suggestion that will arouse their thought. In other words it is an advertisement for the cause. Once interested most people will be willing to investigate when the first comrade comes along and asks for a subscription to some Socialist magazine, paper or book. The Appeal has no other mission, and if it fills this one it will have done a work of incalculable benefit to the cause of Human Liberty.

Who will set the price on cotton and corn, and who will re-eive it and check the same under Socialism.—T.H. Sanders tuel, Texas

I have explained that the price of articles will be regulated by the time consumed in their production. Given the number of days employed in the department of any industry, and any school boy can tell how much ea bushel or round will cost. The public w own all the storage places, and the clerks in charge will receive the grain or other article, and it will be held there until ordered to and it will be held there until ordered to place of manufacturer or consumption, as the case may be. This is simple, while the present system is so complex that the people in it and working it get skinned often, while they are planning to skin others. Socialism will simplify every transaction. The more complicated today the better for those who can give their entire attention to it, as but few can do that and the few have the advantages over the many.

ple, the press, which is the parliament of the people, is often the first to oppose the people, and all but the last to join them! Stranger and all but the last to join them: Stranger still, and yet more pitiful, that the pulpit, which is the tribunal of the people, because it is the platform of the Church, and ought to be therefore the sounding-board of the teachings of Christ, is too often the enemy of the people where they come into collision with the powers He came to destroy! Yet so it is, and though, as a journalist who thinks the debt of the public to the press is deep and lasting, and as a believer who things religious faith essential to the welfare of humanity, I should be sorry to do anything to reduce the authority of the press or of the churches, I cannot but say that both have been impediments to the movement in which the people are struggling for their

I am sorry to say it, but I say it with all em-I am sorry to say it, but I say it with all emphasis, that the churches, speaking of them as a whole, and allowing for notable exceptions, have always been opposed to efforts put forward in the political interests of the people. If it could be shown, as I think it could, that the newspaper press has never yet initiated any great movement for the good of the people, what social reforms have the churches initiated? What did the churches do for the enlargement of representative government? What largement of representative government? What did they do (the claims of some of them not-withstanding) for the emancipation of the slave? What are the Churches doing at this slave? What are the Churches doing at this moment to promulgate in the midst of the war the doctrines of peace? Have any of these things ever been done by the churches, taking them altogether, and all the ages through? Isn't it a fact in the history of humanity that whatever has been done for the political progress of the people has been done by the people ress of the people has been done by the people themselves, outside the tutelage of the churches? Show me a single victory for humanity that has not been won by the people for the people, and often in the face of the churches. I know of none.

This is a serious indictment, but I believe it is a true one, and if the facts are as I say, the reason is not far to seek. Two great forces ar ealways at work to keep the churches back ar ealways at work to keep the while the people are pressing forward. One of these is a low and partly unworthy force, of these is a low and mistaken one. The the other is a high and mistaken one. unworthy force is the material interests of the unworthy force is the material interests of the churches and of their clergy. Few churches are so spiritual but they have their body to think of as well as their soul. The body of the churches in the material sense, is always at war with the soul of the churches. It is always on the side of the existing order, of the government and authority which prevails at the given moment, and consequently it is alalter the social state. Tike the pressule of churches have their material interests with the rich and powerful, and on the side of the thrones and princes.

That is one reason, the lower reason, why the churches have never been pioneers in the social and economic progress of hy anity. The higher reason is the sincere conviction which the churches, as a whole, seem to have taken since the early Christian ages—that the exist-ing order of society is divinely ordained, and any attempt to alter it is a wicked effort to disturb the scheme of the Creator .. Con scious of the misery of the world, of the shock-ing inequalities of wealth and poverty, of fearwant and frightful luxury existing side by side, the churches appear to have despaired of altering anything to any purpose. At a loss to reconcile Christianity to life as it actually is, they have found relief in the idea that the teaching of the Gospel is a purely religious the rich, and the fearful privations of the poor, message which has nothing to do with economic are a part of the divine ordinance, and therequestions or the condition of man in this world. fore—paradoxically enough—evils

They have quoted a number of texts, "The poor ye have always with you", "My Kingdom is not of this world", and "Render unto Caesar the things which are Caesar's", in order to show that the mission of Jesus was in no way directed to the improvement of the material directed to the improvement of the material position of the people, and that with the social and that Christianity is a useless dream, but position of the people, and economic condition of His own or any you cannot say that the Gospel is not pro-other time Christ had nothing whatever to do. When the poor have groaned under their hard mic problems of the world in which we live. When the poor have groaned under their naid.

When the poor have groaned under their naid lot, the churches have told them to look up frequently made by the churches that the leadfrom the miseries of this world to the joys of frequently made by the churches that the leaders of the labor movement are, for the most the servant may be obedient to his master, and the subject may submit to his ruler, whoever the master or the ruler at the given mo-ment may be. -And when, in times of revolution the people have broken down the inequali-ties and the injustices, the tyrannies and the slaveries of the existing order, the churches have generally protested that Jesus was a great conservative, and that He always showed pro-

found respect for law and order.

There is a reason, peculiar to our own time, why the churches have never yet been with the people in the struggle for their social and economic rights. The labor movement labors under the stigma of being an irreligious, movement. Its leaders are thought to be irreligious men, and its claims are believed to be against the teachings of religion. It is the old cry over again, the same that has been raised against every reform carried out in the name of hu-manity since the days of Christ Himself. But it is the duty of the churches to come in and churches themselves, if it can be said that they are only obsolefe aspects in the development of humanity which hinders progress, that of all the agencies towards reform, the churches are the last to move, and that, because the churches will not go on with the people, the people are compelled to go on without the churches. Let the economic and social rederption of the people come through the churches, and the irreligious and godless, if there are such among the people, will disappear,

But is it the fact that the labor movement, either in England or anywhere else, is an irreligious movement? I say it is not an irreli-gious movement, and never has been so. I movement? that the movement of the people for their the most truly religious social movement the world has ever known. What is the religious principle of the Gospel, so far as it concerns the tie of man in this world? Is it not a precia-

mation of the solidarity and brotherliness of the mation of the solidarity and brotherliness of the say that there is nothing in the social teach-whose human family? And what is the princi- ings of Christ which is not in the spirit of fact that, whatever the success of pie of the labor movement but that and that the movement by which is not in the spirit of the Labor movement in this councillary. Strange and pitiful anomaly that the press of a country, which is the voice of the peotry, which is the voice of the peotry. the poor and oppressed in our day just as it fies the unconstituted rights, the inequalities, covered the needs of the poor and oppressed in the barbarities, and the miseries that civilithe days when the Jews were under the heel zation has for two thousand years been strivof the Romans, and when the hypocratical ing to break down. The Christian concept of the Romans, and when the hypocratical ing to break down. The Christian concept of the Romans, and that asserts the pharisees devoted themselves to the cult of government is Right, and that asserts the value of the individual soul, the fatherhood of men, and all that message that it was chiefly intended to bring about an economic reform either in His own day or in ours, but it certainly included as a part of its scheme the relief of poverty and distress and the deliverance of the poor from misery and oppression.

How can we doubt that, with its other and higher aim, the Gospel is a great social message? Look at the plain facts. The first of them is that nineteen bundred years ago a man of the name of Jesus Christ, whom all Christ-endom worships as God, was born poor and bumble, when he might have been born rich and powerful. His poverty was so great that on one occasion He said, almost with bitterness, "The foxes have holes, and the birds of the air have nests, but the Son of Man hath not where to lay his head." He was a work-ing man, and His friends were workingmen and He walked with the poor, and remained with them until the day of his death.

The next fact is that the opinions of Christ were the opinions natural to workingmen, who saw the strength that poverty gives and the burden which wealth imposes. Need I recall the parable of Lazarus to show you that in Christ's view the possession of riches was a great darger to the human soul? Need I re-mind you that He said it was easier for a camel to go through the eye of a needle than for a rich man to enter the Kingdom of Heaven, to prove that He had a poor man's opinions about rich men, and that it seems that as if He could hardly be just to them?

The final fact is that the prayer which we call the Lord's Prayer, the only prayer which Christ taught His people, the prayer into which, presumably. He gathered up (from whatever sources) the whole sum of his teaching, all His parables and sermons, is a social message of overwhelming force. Look at it clause by clause. It begins with the words "Our Father" One Could anything more plainly indicate the orce, equality of all men? If God is our Father, all men are our brothers, and the laws which give higher power and authority to one man than to another, which allow one man to govern for to no better reason than that he was born the cause he was born the second son, are manifestly contrary to Christ's first principle of the relation of man to man, and man to God. The Lord's Prayer says, "Give us this day our daily bread". Could anything indicate more clearly doom to more absolute condemnation the laws of land and capital which permit one man to live in boundless luxury while they require another to linger in the misery of want? The Lord's Prayer says, "Forgive us our trespasses, as we forgive them that trespass against us" Could anything speak plainer on the true re-lation of man to organized society, and the duty of nation to nation or condemn more absolutely the barbarous methods of settling international disputes by recourse to arms? Above all, the Lord's Prayer says. "Thy Kingdom come Thy will be done on earth as it is done in Heaven", and surely nothing could more completely discountenance the conduct of the characters which recognizing in all ages the churches, which, recognizing in all ages the frightful injustices of the existing order, have counseled resignation on the ground that the worst evils of the world, the crying inequali-ties of the classes, the awful extravagances of remedied in another and better existence.

Can there be a more direct message to the living world than this message of the Gospel? You may call it unpractical and Utopian and out of harmony with the progress of civiliza-

of the churches themselves, and not of the Gospel, if that is so. The churches have so persistently resisted the progress of freedom, so frequently told us that the Gosper has according whatever to do with the condition of man in this world, so deliberately tried to druw the people off from the struggle for their just rights, so strenuously exhorted them to patience and submission against intolerable so frequently told us that the Gospel has noth tience and submission against intolerable wrongs, so persistently taught that the Kingdom of Heaven is to be looked for within and not without, that it is little wonder if many men who feel acutely the sufferings of the world, have come to think that Christianity, ith its useless lesson of fatal resignation leaves humanity in the lurch. Can we be sur-prised that such is one of the accusations prised that such is one of the accusa against Christianity when the churches content to talk about the Gospel as if it had nothing to do with the world, as if it were only intended to govern mankind on Sunday. when we put on our Sunday clothes, and our shops are closed and our safes are locked? Car we wonder that when the churches are so much occupied in the sublime office of teaching people how to die, some hot-blooded but honest souls should tell them that it is infinitely more necessary to know how to live?

But the solid body of the Labor party are are not to be found among the unbelievers.

The vast multitude of them, though they may be outside the churches, are holding onto the fundamental things of the Christian religion, and they are not to be driven out of them by any menaces or any misinterpretation of the Gospel lesson in relation to the life of the world. We don't say that the Gospel is nothing more than a social message, but we do say ing more than a social message, but we do say that its social message is an essential part of its message of Eternal Life. We don't say that Christ was merely a great social reformer; but we do say that without being a social reformer He could not have been Christ. We don't say that the churches should devote themselves exclusively to social and conomic conditions, but we do say that if they ignore

these questions, they set aside one Unexpected Adversaries to Labor.

With this message, as it expresses itself from time to time in the problems we are called on to consider, let us meet all our difficulties, knowing that our appeal is to the conscience of man that the conscience of man is the true expres-sion of the divine, and that sooner or later, in God's good time, the divine must prevail.

A Word Picture by Tolstoi.

A boy is bosn in the country. Laboring always with his father, grandfather, his mother, he sees each year the finest crops from the fields and his father have and sowed—the fields that his mother and sister have mowed and reaped, binding the corn into the sheaves which he himself has helped to stack—he sees always that his father car-ries the best of these crops, not to his own house, but to the squire's barn beyond the manor gardens.

As they pass the manor house with the creaking cart he and his father have piled up the boy sees on the veranda a richly dressed lady seated at a table spread with a silver kettle, fine china, cakes and sweets; on the other side of the carriage drive he sees the squire's two sons in shining shoes and em broidered shirts playing ball on the smooth

The boy's father has gone on with the cart. The boy runs along the road to catch them up, kicking up the dust with his clumsy, worn-out boots, and together they reach the barn, which is crowded with carts and sheaves. The busting overseer, his canvas jacket wet with sweat at the back, and a stick in his hand, greets the boy's father with an oath for driving up the wrong place. The father spole gizes, turns back weather. From the above experience we are enabled to arrive at the conslusion that the expense of free text books is much less than that of in-dividual ownership. There is clearly a gain of length of time the books can be used, making a total saving of fully 50% to every punit.

This is the way it is done in Russia. The sale of the products enables the idlers to get the services of the city and factory workers, exchanges the labor of the renters of the land for changes the labor of the renters of the land for the skill of the shop and office. The renters in the United States are in just the same relation as the renters, in Russia. But here the robbery is greater, for the rich and powerful have so organized every industry that the working people cannot eat, drink or look at anything unless they pay the tribute which greed has placed in the price in the shape of extortionate profits. Let us not waste our sympathy on the poor Russian; better that we look about us and understand that we too are sufpathy on the poor Russian; better that we look about us and understand that we too are sufferers from the same system, differing only in the form of application. We have the Russian industrial conditions here—the supporting of the idle by the workers. Even the farmers who own their land have to divide with the owners of trusts, because the latter takes the better part of their crops by the price they put on the twine, the wire, the implements, the groceries, the lumber, the clothing and other things the farmers buy. This part of the robbery has not been so well organized in Russia as it is in America. With the advent of the great farm, with scientific management, Tolstoi's picture of Russian farm life will be reproduced here—on a more intense scale. Will this fall on deaf ears as you read it? read it?

Do you know what people said and thought of these changes at the time of their making?

They raised the cry "Paternalism." They claimed that the government was assuming the work, rights and privileges of the people; that the sole power of government lay in its police—or should; that its sole business was to keep the peace, protect property, and punish criminals. Of the free text book proposition it may be said not to be a new one. It has been on trial for years and has surpassed the most sanguine expectations of its most earnest advocates. An Overdose of Incentive.

The objection to Socialism most frequently The objection to Socialism most frequently encountered is the idea that socialized industry would remove the incentive to effort. Incentive is regarded as the indespensible article that moves the universe and the human family. Probably it does, but recent developments indicate that like many other things that are good when used in moderation, incentive like fire or fire-water may consume its possessor. For some time it has been reported that Mr. Rockefeller has been unable to eat a For some time it has been reported that Mr. Rockefeller has been unable to eat a square meal and that he is in more or less of a broken down condition. Now comes the report that J. Pierpont Morgan has taken an over-dose of the incentive-knock-out-drops and is going to Europe to recover.

Most of these boys live in the country, eight nd ten miles from the factory. The strike which has been running against the More Jones factories in Bridgeton and at Minotola has temporarily released all of the available boys in the towns, and the factory owners have been compelled to go out into the farming dis-tricts to secure their prey. The Ship of State.

I have been reading certain fulsome articles in the Saturday Evening Post upon those Captains of Industry who ate "mit der prinz" in New York. It calls to mind Mr. W. V. Moody's "Gloucester Moors". Mr. Moody compares the Earth to a ship, and then:

HE conditions which prevail in the the use of child labor is perhaps that of George S. Bacon, general manager of the Whitehall Taitum Mills at Millville, N. J., where some effort is made to live up to the requirements of the law.

Mr. Bacon made no effort to conceal the fact that the use of child labor was simply and solely because it was cheaper, and Bacon was very emphatic in declaring that he would not want any sons of his, even at the age of twelve, to enter the glass factories. When asked what would be done if the minimum age at which children could be employed

was raised to sixteen years, he said:
"I suppose we would try to reach the condition, but to raise the age would make it more costly to make glass. The older the boys the bigger the wages we would have to pay them, and this is the situation in a sentence.
The proprietors of the glass factories say that they must have boys to do the work be men can't do it, because men are too tall to do the constant bending made necessary and cause the boys are more active and agile.

For factory proprietor grades all his salaries proportionately to those paid the boy, and in con-sequence adult labor averages from \$1 to \$1.50 per day lower than that of almost every other

It has this depressing effect upon adult la bor that the employment of children has that caused the glass blowers' union to make a determined stand against the evil, that it goes without saying that the labor leaders are as alive to the inhumanity of the situation as anyone. And it must be understood that it is not only in the non-union shops, but in those, whe the union is recognized as well, that the evil of child labor prevails and general low wages prevail, although a more consistent effort is ade by the union shops to enforce the law than elsewhere.

Not all of the children have been deprived of educational advantages either, though most

New Zealand as an Eden-

London, June 17.—At the annual New Zea-land banquet, which was held in London to-night, R. J. Sedden, Prime Minister of New Zealand, who is one of the most interesting pergonalities among the Colonial Premiers, gave a glowing description of the conditions in

he colony.

He said it had pushed social reform to the verge of what many outsiders considered radi-cal Socialism. Time had demonstrated the soundness of this economic experiment, con-tinued the Premier, with the result that now New Zealand has little crime, no poverty, ev-erybody has employment, and the New Zealand-ers are a happy, free and enlightened people.— Baltimore Sun.

Owners are Rulers.

All who have read John Collins' book, "THE TRUTH ABOUT SOCIALISM" were no doubt impressed with the statement, "Whoever owns the wealth of a nation will control the govern-

ment and politics of that nation".

How easy that fact is to prove. In every neighborhood, the people of property are the "influential" or ruling class, and the principle applies to cities, states and nations.

When all the people own all the property and not until then will all the people have an equal voice in government.

New Zealand.

From a letter written by Archie H. Green from Wellington, New Zealand, to the San Diegan Sun, published in San Diego, Cal., we the following relative to conditions New Zealand.

"New Zealand is said to be the most prosperous country in the world. There are no beggars to be seen on the streets, and a New Zealander is unacquainted with the "hobo" There are no unemployed, and the wages are very good. The cost of living is a triffe more than it is in the United States—but work is generally more easily obtained. The labor class here are in power and the labor laws are very stringent. No employer is allowed to work his men over eight hours a day, and he is obliged to give him a half holiday every week, besides Sunday. Every place of business and factory has to be closed on a legal holiday, which occurs very often in this country. New Zealand is called the "laboratory for political experiments', and many things have been tried here for the first time. This government would if possible just suit the Socialist party of our country. The government owns the railroads, the telegraph systems, telephone system, all the street cars, all the water sys-tems, lighting systems, and there is a government insurance company which is run by the government, backed up by the government funds, and officers appointed by the ministry Some of the representatives in parliament were proposing that the government should open and run a large silver mine in the south island. it. The government holds a remote claim or almost all the land of the colony, as it is only let out on a 999-year lease. If a man does not use his land to its best advantage, but allows it to decline, the government pays him for what it is worth and sells it off to other parties. Like France, this is a or of small farms".

The New Chinese Law.

Samuel Gompers says in the American Federationist concerning the new Chinese exclusion law:
"The entire measure is as defective, decep

tive and inefficient to accomplish the desired purpose as such a piece of patchwork, of which the law is composed, well can be. It presents one of the most conspicuous pieces of bung-ling or vicious legislation, or both, ever enacted by congress. It is a menace not only to the workers of the United States, but to our repub-

lic and to our civilization."

In view of this one fact, to say nothing about many others of the same character, how can Mr. Gompers consistently be opposed to the American Federation of Labor declaring for Socialism? If the old political methods fail to bring about the results desired, why not try

Workingmen of America, vote together for candidates of your own class. If you will not do this, prepare for Chinese conditions. Waking the Giant.

At the electrical convention held at San Francisco recently, the president who is president of an electrical company, seeing the trend of public opinion, spoke the following warning to his brother exploiters:

"The risk from labor troubles is not the least of the factors in our equation." Linemen and station keepers have us at their mercy even more so than motormen and conductors have a city railroad. Already the linemen have struck for the eight hour day and three dollar wage. Success may breed and encourage larger demands. Allied to the growing menace of or-ganized labor is the seething of the communistic tendencies of the times. Foremost among ship of public utilities. This we need not fear since municipalities need our cheap power FOR US A FAR MORE DANGEROUS AGITA-TION IS THAT WHICH NOW PROPOSES STATE APPROPRIATION OF ALL WATER The scheme advocated makes the appropriation little less than sheer confisca-tion. Indeed the movement is simply an organization for public robbery on a large The agitation is being vigorously pushed in the name of progress, and the masses are easily blinded as to their duties toward vested rights and are often misled into extravagancies

Consternation in Colorado

The announcement of Debs' removal to Colorado has thrown the editor of the Pueblo Chieftain into such trepidation that in nearly a col-umn of nervous shrieks he warns the good people of the Centennial state against "reckless ple of the Centennial state against reckless remorseless vivisection" and other blood-curdling things which he would have his readers believe to be part of the Secialist program. Like the little bug that lives under the big rock and fears nothing so much as the light the illuminating presence of Mr. Debs moves the editor of the Chieftain to laughable antics.

That the sleepy defenders of dying supersti-tion should be slightly stirred is no more than would be expected after the recent Denver convention, but his fear of the seduction of the unmarried men in Colorado and the total disruption of society should not be taken too seriously but rather be regarded as the peevish prattling of a second-time child who don't want the Socialist boys to play in his yard .

Western Union employes are re-organizing; their union was broken up in 1883.

The sixth week of the anthracite coal strike was completed June 21st, when it was esti-mated that the losses up to that time aggregated \$35,395.00.

Because boys shouted "scab" at a company thug at Mahanoy City, Pa., the guard chased them, firing into the crowd and wounding John McCann, a seventeen year old boy.

Fifteen thousand Pullman conductors have signed a petition asking for an increase of wages and uniforms after a year's service. They will strike unless the demands are granted.

The Ninth Pennsylvania regiment is going to pieces. The members feared they would be called out during the miners' strike, and were not willing to be used in the interest of the corretors. the operators.

Five hundred drivers and handlers employed by the coal dealers of Albany, N. Y., went out on a strike recently, demanding a uniform rate of \$2 a day; the rate heretofore has been \$10 a week.

Seventy telephone girls at Des Moines, Ia., struck on the 21st, for \$30 per month and a nine-hour day. The girls have organized a union; affiliating with the American Federation of Labor and the strike may spread over the state. Three hundred men employed as Pullman

car cleaners have gone on strike at Chicago for better wages and pay for overtime. The men have organized the United Order of Car Cleaners' Union No. 1 and application has been made to the American Federation of Labor for a charter. Easton, Pa., June 21.—The coal strike has

had a serious effect upon the iron industry in the Lehigh valley. Every iron dealer is quoted as saying there is not a pound of pig iron on the market in the valley. The scarcity of pig iron will be the cause of shutting down many of other industries using that product unless the miners go to work in a very duct, unless the miners go to work in a very short time.

Watch It Grow:

Senator Gorman says there is a "marked in-clination among the masses to break away from old party lines, in order to punish people responsible for present conditions."

A writer in the Missouri World from St. A writer in the Missouri world from St. Clair county, in sending in a little club to that paper, says (and it is printed in the pa-per): "It is hard to get any one to take a re-form paper any more in this section, all seem to be stuck on Socialism." Growin', is it? Senator Hanna is all worked up over the

cnormous growth of Socialism. His fear is that he will not be able to control the politics of this country when the people awake to their constitutional power; and of course he is using all his energies to prevent the people from knowing what they have the power

S. P. Gustin writes his local paper from Nebo, Mo., to have the democratic committee send speakers there "to expose the fallaries of send speakers there "to expose the fallaries of Socialism, a creed that seems to be gaining some foothold in that community." The lacal paper says they have no speakers now, but later on (when some candidates have been put up) some may be sent! Say, won't that be nuts for the Socialists? Growing, is it? Well, just watch it grow and the more it is discussed the more it will grow.

Optimism.

The Socialist is the only hand on the job who can afford to wear a smile. While the hangers-on to capitalism are trying to be brave and whistling to keep up courage, the fellow who knows capitalism is doomed goes way up front, stands on his tip-toes, and laughs at the dismay of those who "view with alarm the aggressions of concentrated wealth."

Pompous manufacturers, who would never
give up their shops to the state, are handing
them over readily to the trusts. Gentlemen of
consequence who insist upon running their
own business their own way, are easily persuaded by a combination to get in line with the
new order of things. new order of things.

Capitalism, crazed with its piratical success is preparing the soil for national co-operation and at the same time digging his own grave That is why the Socialist, disgusted as he is with present conditions, can look hopefully to the future and not suffer a nervous collapse every time a new trust shows its teeth.

It seems to be a fundamental principle of gambling to play for all there is in sight, so that the trust only follows the same lines of the retail crap shooter when it goes after mil-lions. Both games are sure to end, however, when the loser runs out of funds, and at that critical period the people will take a hand.

the republic a state of things which makes it treason where our flag flies, to talk of Concord and of Bunker Hill, to read the speeches of Patrick Henry and James Otis or to circulate the Declaration of Independence. We cannot the Declaration of Independence. We cannot afford to put the story of the revolution under lock and key, nor suppress the glorious truths of our great charter of liberty. Wherever the fing flies it must open all the pages of our history, let consequences be what they may. This republic cannot afford to expunge the noblest chapters of its life story to accommodate and chapters of its life story to accommodate any transient policy, any passing fashion of states-manship.—Rev. How Could He Earn It?

M. Camille Flammarion, the well-known French writer on astronomy, mentioned at the last meeting of the French Astronomical Socithat the Christian era has just completed its first milliard of minutes. Between January, 1 of the year 1, and April 18 of the year 1902, at 6:10 p. m., he says, just one thousand million minutes have passed.

The statement suggests a realization of the

mething of a thousand million in the abstract, and still more of a thousand million in the concrete form of money. Mr. John D. Rockefeller's fortune, for instance, is generally estimated at about two hundred million dollars, or, say, a thousand million francs. We all re-nize that this is an enormous quantity, but trouble with most of us is that a single million seems almost as remote from our poss as a thousand million, so that the

as a thousand million, so that the greater
sum does not differentiate itself sufficiently,
from the smaller.

Let us see, then, what Mr. Rockefeller's fortune of a thousand million francs means. It
means that if a man had been working steadily,
day and night from the birth of Christ to the
present time at the compensation of a franc a minute his total earnings would just now have reached the amount of Mr. Rockefeller's pile. A franc a minute is very handsome pay. \$12 an hour, or \$300 a day. A man getting \$300 every day, from the beginning of the year 1 to the present time, and consuming none of his earnings, would only just now have as much as Mr. Rockefeller has. Or, putting it in another way, imagine a town containing 300 working people, each earning \$7 a week. The total wages earned by the people of this town, in successive generations all the way from the time of Christ to the present day, would not exceed the amount which one man has managed to put by in the course of a single life-time. Truly a thousand million is a great sum —Baltimore News. sum.-Baltimore News.

The resources, advantages and powers of the American people are very great, and they have consequently succeeded to equally great re-sponsibilities. It seems to have dever ed upon them to test whether a government established on the principles of human freedom can be maintained against an effort to build one upon an exclusive foundation of buman bondage,-

Most governments have been based, practic ally, on the denial of the equal rights of men. They Ours began by affirming those rights. "some men are too ignorant and victous are in government". "Possibly so", said "and by your system you would always keep them ignorant and vicious. We propose to give all a chance; and we expect the weak to grow stronger, the ignorant wiser and all better and happier together" .- (July 1, 1854, Fragment-Complete Works, Vol. 1, p. 178).

When we were the political slaves of king George, and wanted to be free, we called the maxim that "all men are created equal" a selfevident truth, but now when we have grown far and have lost all dread of being siaves ourselves, we have become so greedy to be pasters that we call the same maxim "a self-evident lie." The Fourth of July has not quite evident lie." The Fourth of July has not quite dwindled away; it is still a great day—for tabor and education are incompatible and any practical combination of them impossible. Any people, anywhere, being inclined and having the power, have the right to rise up blind, and shake off the existing government and According form a new one that suits them better. This is a most valuable, a most sacred right—a dangerous right which we hope and believe is to liberate In fact. this right confined to cases in which the whole people of an existing government may choose to exercise it. Any por-tion of such a people that can may revolution-ize and make their own of so much of the ter-ritory as they inhabit.—(January 12, 1848, ritory as they inhabit.—(January Speech in Congress—Barrett, p. 84.)

No man is good enough to govern another without that other's consent. When the white man governs himself that is self-government; but when he governs himself and also governs another man—then that is more than self-government—that is despotism. Our reliance is in the love of liberty which God has planted. in us; our defense is in the spirit which prizes liberty as the heritage of all men in all lands, everywhere. Those who deny freedom to others deserve it not for themselves, and under a just God cannot long retain it.—(October 1, 1854, Speech at Springfield, Ill.—Coffin, p. 145).

The fight must go on. The cause of civil vine right of kings. It is the same principle liberty must not be surrendered at the end of one or even one hundred defeats—(Nov. 19, 1858, Letter to H. Asbury.—Herndon, p. 414.)

It may seem strange that any men should dare to ask a just God's assistance in wringing by the same spirit that says, "You work and toil and earn bread and I'll eat it". No matter in what shape it comes, whether from the mouth of a king who seeks to bestride the people of the come and live by the fruit of their labor, or from one race of men as an apology for enslaving another race, it is the same ty-rannical principle.—(October 15, 1858, Speech at Alton, Ills.—(Debates,p. 234).

> In the early days of our race the Almighty said to the first of our race, "In the sweat of thy face shalt thou eat bread", and since then, if we except the light and air of heaven, no good thing has been or can be enjoyed by us without first having cost labor. And inasmuch as most good things have been produced by labor, it follows that all such things of right belong to those whose labor has produced But it has so happened, in all ages of the world, that some have labored, and others without labor, enjoyed a large portion of the fruits. This is wrong and should not continne. To secure to each laborer the whole product of his labor, or as nearly as possible is a worthy object of any good government.— (December 1, 1847, Fragment of Speech—Complete Works, Vol. 1, p. 92).

If A can prove, however, conclusively, that he may of right enslave B, why may not B snatch the same argument and prove equally that he may enslave A? You say A is white and B is black. It is color, then—the lighter having the right to enslave the darker? Take care! By this rule you are to be the slave of the first man you meet with a fairer skin than your own. You do not mean color exactly? You mean the whites are intellectually the superiors of the blacks, and, therefore have the right to enslave them? Monarchy itself is sometime.

I have always thought that all men should be free, but if any should be slaves it should be first those who desire it for themselves, and secondly those who desire it for others. It is the effort to place capital on an equal footing with, if not above, labor, in the structure of government. It is assumed that labor is available only in connection with capital that nobody labors unless somebody else owning capital, somehow by the use of it.

"Why, at the point of a pistol, to be sure. He stopped the coach and made them stand and deliver."

"That was awful, wasn't it, pa?"
"Yes, he deserved a dozen deaths."

"Did robbing people make him celebrated?"
"Why, yes, that and the fact that he robbed no one but the rich, and then gave part of what he got from the rich to the poor."

"What is robbery as you understand it?" "Why, it is taking what does not belong to you, or in other words taking something with-out rendering an equivalent."

"Those are big words, pa, what do you mean by rendering an equivalent?"
"Why it means that you cannot honestly get something for nothing. That was what they objected to in Turpin's methods. He took people's money or property without giving anything in return."

"But he was generous to the poor, you said."
"Yes, but that did not afone for his methods "His methods! Are there any other methods of robbery, pa?"
"Oh, yes, lots of them."
"What are they?"
"Oh, there

there are various ways, cheating swindling and obtaining money under false pretenses are some of them."

"What do you mean by false pretenses?"
"Oh, there are many ways of doing that, one that I happen to think of is smuggling." "What is smuggling?

"What is smugging?

"And is getting money under false preenses, too?" Yes, my son, that is right."

"Do you think that the property of every-body that gets money under false pretenses ought to be confiscated?" "Yes I do."

"Then why don't the government confiscate the railroads? Only the other day I have you say that they watered their stock to more than double its value in order to make the people pay bigger dividends. Why do they water it? Can't they make the rates such as to make them pay bigger dividends anyway?"

"Oh, you don't understand. The railroads are 'quassi' public property and there is a law in some states that after they earn a certain

"But I'd like to know why obtaining money under false pretenses is a crime in one case and not in another. Only the other day I read where a man gave away \$10,000,000, and another one gave a big lot over a million to the Chicago university."

Comrade Kinnan of Whiting, Kans., sets the Monthly forward with a good subscription list. The report from Denver, Colo., is that the cause is simply gaining by "leaps and bounds."

Comrade McDonald of Lombard, Mont., bas started the Appeal to six Lombards for a year. Comrade Cross of Douglass City, Alaska, fires in a club of five from that far northern region.

Comrade Kline of St. Charles, Mo., sends us a fine list of his townsmen who want to be shown.

Comrade Seaman of Norden, Neb., rolls the charlot along by means of a good club for the Monthly.

Comrade Hull of Great Falls, Mont., is work ing for a great fall of capitalism, and is doing

Comrade Townsend of Smithville, Ont., is scattering the Appeal among the husbandmen in that locality.

Comrade McClung of Indianola, Neb., rallies to the support of the young Monthly and sends in a club of ten.

Comrade Groff of Kansas City, Mo., among other good things he has been doing, sends in a good list for the Monthly. Comrade Smith of Omaha, Neb., does the

great Smith family credit by his splendid order for assorted literature. Comrade Hileman of Jonesboro, Ills., is a

woman who joins the Appeal Army and sends in her first club of five. Comrade Strausser of North English, Iowa

in his first club of four and says, "The Appeal is all right: can't be beat". Comrade Brandon of Clyde, Kansas, made the office canine happy last week with the pres-

ent of a long string of yearlies. Comrade Johnson of Omaha, Neb., fires in an assorted order from that city that will count in

the work for the Co-operative Commonwealth. Comrade Boaz of Vancouver, B. C., sends in splendid club for the Appeal and is doing excellent work among the British Columbians.

Comrade Jabez Sidaway of Stafford Springs, Conn., aged 76, passed into the beyond June He was one of the most earnest of the Appeal Army. Comrade Fischer of Dubuque, Iowa fires in

a club of six and being too full of enthusiasm to express it in words just writes the order with red ink. Comrade Turner of Cedarvale, Calif.,

eighty-six years of age, but is young enough to get around and stir up a good batch of subscribers for the Appeal. A railroad boy from Michigan writes:

Telegraphic Train Order No. 1, from New York was received at this office and is now in the hands of the red-headed girl. Miss Red-head says that each and every Appeal train ordered will leave this station on time, and for

traffic at that end and keep the wires warm as she has an unlimited supply of rolling stock and equipment.

If the Appeal falls short of the mark this week we beg the Comrades to be charitable for you have all gone through the ordeal of moving and know how strenuous is the job of moving the Appeal plant for only the distance of a block. The red-headed girl and the canine are in charge this week, so if the paper goes wrong just charge it up to them.

'A Gentleman" Deplores Criticism of the Judiciary.

It is incumbent upon every enlightened and conservative citizen to protest against the attacks upon the judiciary. And permit me to sault than that which you make upon Justice Simeon E. Baldwin of the supreme Court of Connecticut has seldom shocked whatever is est in the community.

And why do you insult a wise and honored jurist?

Simply because Judge Baldwin, whom I personally know to be revered by the wealth and culture of his state, has said that "there are too many lace curtains in the working-men's homes," and that they "eat too much meat," twice as much as "the European work-These statements are undeniably true; yet

you cry out against Judge Baldwin and do your demagogical best to incite the animosity of the wasteful, extravagant, oversal and pampered working classes against the You encourage them to combine and extort from capital wages that shall enable them not ly to gorge themselves on meat, but to 'planos and pictures' to the lace curtains with which they bedeck their thriftless homes Sir, you are a breeder of discontent, a fo-menter of class hatred, and as such are an enof social peace a promoter of lawlessness

For nothing can be more perniclous than to excite in the humble classes a desire for lux-ury and ambitions which render them dissatisfied with the condition in life in which it

pleased Providence to place them. The result of such counsel as yours must inevitably be to cause workingmen to give thought to improving their homes, clothing themselves, their wives and their children beyond their class, and in general to absorb their minds in selfish schemes.

Thought is energy. Energy, like time, is more. The workingment therefore when is

money. The workingman, therefore, who ex-pends time and energy in self-seeking plansincluding your preposterous "plano and plc-tures"—has just that much less thought and energy to give to his work, and thus his employer is robbed.

There may easily be too much comfort in the workingman's home. It is not well for the hardy toiler who does the world's work for us to become softened and effeminate through luxury. Besides, when he is paid too well and accumulates money in the savings banks he is prone to become insolent toward his betters. This is a fruitful source of those disturbing conflicts between labor and car which every conservative citizen deplores.

The lace curtains, planos and pictures which you urge the workingman to strive for can-not but have the most unfeeling, the most baleful, social consequences.

The greater the contrast between the homes of the educated and refined and those of the ignorant multitude the greater is the salutary respect in which the poor hold the rich. Give the worker lace curtains, pictures and a plane

and it follows as night the day that he will lose that humility which befits him.

At the bottom of your crafty and unpardonable appeal to class envy, class hatred—the most odious and repulsive of all mob passions—is the democratic illusion, to the perpetuation and surged of which your proceed. petuation and spread of which your petuation and spread of which your paper devotes itself with such sinister persistence.

You say that my honored friend Judge Bald-

win would "debase the worker from man's estate to the status of a beast of burden." That is an extreme statement, of course; yet what, after all, IS the worker but a beast of burden? Is it not a fact that he relieves the rest of us from labor exactly as his four-footed

counterpart relieves us of the necessity of carrving loads? And a most useful and honorable function. too, in both cases. No one can exceed myself in respect for the worker; yet, as a man of thought, experience and property, I know the

thought, experience and property, I know the necessity of keeping him in his place.

And his place is not a home with lace curtains, pictures and a plano. Give him the necessaries of life, keep him in good health, without which he cannot labor, and treat him with all kindness while he merits it; but let us have no inflammatory haranguing about home property of the have no inflammatory haranguing about household luxury, gentleman's raiment, an ex-tensive menu and other features of civilization tensive menu and other leatures of the leisure properly appertaining alone to the leisure class. That way lie discontent, political agi-tation and social change; in short, anarchy, tation and social change; in short, anarchy,

Do not deceive yourself into thinking that Connecticut's foremost jurist, my able friend Judge Baldwin, stands alone in deprecating the overfeeding of the working class and their wicked waste of money in estentation as ex-

wicked waste of money in ostentation, as emplified by lace curtains.

Sir, Judge Baldwin, like myself, differs from the majority of serious minded men of the higher orders only in the courage with the courage w the higher orders only in the courage which he speaks. He gives voice to a feeling of alarm which, did you move in good society, you would not need to be told, is both deep and widespread.

In the name of social order, for our common country's sake, I urge you to cease implanting the seeds of class hatred by truckling to ng the seeds of class native, he workingman's lust for luxury, the wind. Beware the
