McNamara's kidnaping is a foul and damnable blot upon the state of Indiana. He was given no chance to resist extradition. Governor, Marshall, who has always posed as the friend of labor, honored the requisition in private. The arrest was made in secret and although McNamara pleaded for time to employ legal council he was brutally denie, and rushed from the state by the corporation rushed from the state by the corporation hirelings who will get the blood money furnished by monsters who expect to

McNamara is totally innocent so far as the public knows and yet he is not as the public knows and yet he is not only surrendered like a dog without an instant's hesitation, but is denied the legal rights to employ counsel to show why he should not be torn from his home and friends and rushed two thousand miles away to be railroaded to the penitentiary

Taylor was a capitalist politician; Mc-Namara is only a labor union official. Another demonstration that under the capitalist system the law is for the capitalist class and against the working

class. Within twenty minutes after Gov. Marshall had secretly granted the requisition McNamara had been secretly arrested. The victim in charge of four detectives was hustled into a waiting auto and hurried from the city to a railroad train and rushed beyond the borders of the state before his friends could have the chance to assert his legal rights, and fight his extradition. It is simply monstrous.

Worse Than Treason Al! this yawp you hear about war beween this country and Japan is manufactured and paid for. The president has denied the stories and it has been aired by very prominent men-yet it still persists. The N. Y. Do you, dear reader, not see the why? Two battleships a year means five to ten millions a year profit to the contractors who built the ships. That profit is the real cause of the agitation and of the war, if war comes. And it may come—may be forced—for these rich ship building firms have much influence with the high narry officials and can have them do things that will make war certain. War is profitable to many people—and they want it. Now if the war vessels were built in publicly-owned ship yards, and all done by the day instead of by contract, there would be no profit to any one in the building of more ships, and hence there would be no conspiracy to force this country into war for the profits that would come for building ships and other munitions of destruc-tion. But you Americans are such easy trained to believe in the sacredness of private profits, that you help along the system that makes for war by your own assinine stupidity. Why, most of you would do the same thing. You would sell your souls to

### The Leavenworth Case

About one year ago, P. J. Zickgraf, formerly a guard at the federal penitentiary at Leavenworth, submitted to the APPEAL certain evidence disclosing But enough has been said. There is conditions in that processing for argument here. The place in the world outside of Russia. So preposterous and disgraceful were the practices charged that I could not ing capitalists is in the process of evolubring myself to believe they were true Sometime prior to the submission by ex-Guard Zickgraf of this evidence, I visited the federal penitentiary in company with Comrade Debs on behalf of the Mexican patriot, Editor Araujo. On this occasion I met Warden Mc Claughry, who took great pains to impress us with the reforms he had in stituted in prison practice. -The prison is being rebuilt of concrete and steel. A scientific system of ventilation has been installed and the sanitary arrangements are perfect. The old time suit of stripes has been discarded and the lock-step has been abolished. Many other reforms, so the visitor is informed, have been instituted, all designed to make the against the illegal and secretive methods of Governor Marshall and Detective Burns in kidnaping McNamara of the Structural Iron Workers of Indianapolis informed us, not take away the sense of punishment, but to inspire the convict with the desire to lead a better life when released from the institution

You can imagine my surprise when evidence was submitted to the APPEAL showing that underneath this veneer of respectability there existed a sink hole of iniquity and graft that would make a Sodomite blush with shame.

After a staff consultation it was decided to send George H. Shoaf, the APPEAL'S special investigator, to Leavenworth. After months of untiring effort he submitted his findings. His report confirmed all that ex-Guard Zickgraf had charged. Still I felt unconvinced. I was loath to believe, even with all my knowledge of human nature under capitalism, that men could sink so far below the level of the beast. Before publishing these charges, which I felt it a duty the APPEAL owed to the unfortunates incarcerated in that capitalist bastile. I determined to leave no stone unturned to secure all the facts. I therefore commissioned A. W. Ricker. another APPEAL investigator, to go to Leavenworth. His finding also confirmed the charges made against the institution by ex-Guard Zickgraf To further convince myself and to be absolutely sure that there could be no mistake, I took the time to personally interview many of the witnesses whose testimony will be introduced in these columns from time to time to substantiate the charges the APPEAL will make against the management of the federal penitentiary at Leavenworth.

When ordering your paper changed from one address to another it is absolutely necessary that you give your expiration number. Let me impress this forceably on all comrades. With a mailing list so large as the Appeal's It is impossible to find names and addresses unless expiration number recompanies order to change. This may appear a little thing to you, but two minutes in the Appeal office would show you how necessary it is Please don't forget this.

If the number 805 is on the little yellow label con 805 taining your name your APPEAL will stop coming in two weeks. You will have to renew now if you would not miss a copy.

Are you one of them?

If you are, read Morrissey's "formal statement to the unterstate commerce commission in support of the proposed advance in freight rates for the railroads," doubtless prepared for him by some attorney or statistician of the railroads. You will then see that you are a sucker, and a feeble-minded one at that, to allow yourself to be used to cut you own throat for the benefit of Morrissey and the railroads.

But there is another point to be considered and this is of vital interest to the several brotherhoods. If the American Employes and Investors association is successful in carrying out its declared object, it will undermine and destroy all the servines of the employes. The third assistant postmaster general informed us through the local postmaster that such action was contrary to the "law," and that unless we desisted, the second-class mailing privilege to the Coming Nation would be taken away. So the best we can do is to ask you to subscribe for the Coming Nation and the profits will be used to carry this case and other cases through the courts. There is no authority in laws passed by congress for the third assistant's action, but under our peculiar legal institutions the third assistant is bigger than the lawmaking body of the nation The question is: Is he bigger than the Appeal Army? Your response, on the blank below, will determine that question:

Washington, D. C., May 4th, 1908.

Mr. P. Louis Zickgraf, Leavenworth, Kan.

My Dene Sir: I have been ill, or should
have replied to your letter of the Z6th ull.
before this.

I synapathize with you in your difficulty,
and shall be pleased to do anything within
my power to unravel the situation and restore you to your position. I shall take
occasion to call at an early day at the department of justice in relation to the matier. I am not advising you to come on
to Washington, though as to this you must
ladge for yourself. The disposition on the
part of the authorities, exhibited at times,
to stand by their appointee is very strong,
and frequent injustice is done to the subordinate who exposes the moral delinquesclass of his superior. It should not be so,
but is nevertheless.

took his case, but he never could get them to go further than filing the suit. He is firmly of the opinion that these attorneys simply used this suit for the purpose of blackmailing Lemon. This was disillusionment Number Four.

Zickgrai was now thoroughly down and out and he went to work for an insurance company to carn a living for his wife and the baby that had come to the home. An older head and one more familiar with life would have realized the hopelessness of an attempt to prove anything against the management of an official like McClanghey, who has been a public beneficiary for forty years and who has been undoubtedly a part of that inner circle of politicians who rule the destinies of the country.

Zickgraf might have remained an observe and disgraced ex-prison guard but for the fact that some Socialist literative fell into his hands, appealed to his reason, induced him to investigate, and reason, induced him to investigate, and tracked the control of the country. He found also that the guards were expected to make false charges against convicts when such charges were demanded by the management. This was disillusionment Number One, but a greater one than this was to follow. Instead price must be unconscious of the conduct of the prison officials and that if he would bring the facts to the attention of the department of justice he could bring about an investigation, the dismissal of the corrupt and deprayed officials, and a change in prison management.

tiary cannot be told in these columns. It can only be imagined.

More nauseating than the debauchery itself is the protection the deputy warden extends to those prisoners who engage in it. From information at hand, Deputy Warden Lemon, in his treatment of the prisoners, discriminates against those who try to lead pure and wholesome lives in favor of degenerates who engage in like practices with himself. As McDonough well says, if you want to be the deputy's friend, be a smitch and indulge in sodomy; if you want to be his enemy, tell the truth and live a moral life!

Congress and the Scalolists

Some day see the light of day, and the people will then put a stop to the only cause for crime, vice and insanity, namely, capitalism.

Thousands of petitions demanding the recall of the troops along the Mexican border are pouring into Représentative Berger's office. It is planned to have all these petitions rolled up into one large roll and have them presented to congress some day this week. When this is done it ought to show even our friends, the enemy, that the people of this country hat bloodshed, and have declared a relentless war against war.

### Congress and the Socialists

Washington Correspondent of APPEAL Washington, D. C.—"The constitution of the United States is antiquated, obsolete and really a hindrance to any reasonable growth in our public life, and, therefore, it should be changed."

"Article XVII. The congress shall have power, by a majority vote of both houses, to call a convention for the pur-pose of revising or amending the con-stitution."

Berger's blunt remarks regarding the history of our "sacred" constitution has created a sensation in capitalist circles. These gentry are particularly impressed by the fact that these "blasphemous" words come from the lips of a duly seated member of the United States con-

"Since that time tremendous economic changes have taken place. Steam and electricity have been utilized. Wonderful inventions have been made. The en-tire economic structure has been changed.

"And yet with all these wonderful changes which the framers of the con-stitution could have not foreseen," declared Berger, 'we are still living under a constitution made for hunters and farmers. And what is worse, this constitution, since its adoption, has been materially changed but once, and that through a terrific war."

DeLara in Prison

L. G. Delara, the Mexican Socialist who was for sometime organizer of the Socialist party in the United States, was seronionally reported killed in a battle in Mexico. Instead of that, he is in fall at El Paso, accused of violating the neutrality laws. He had been in the insurgent army, and on recutering the United States was arrested. Protests against his inparceration ought to be made, less he be railroaded to prison as was Arrajo.

Appeal's New Calendar.

Appeal's New Calendar.

The Appeal's New Calendar for 1911-12 will be ready by May 1. This is the second in the series. The drawing is by Ryan Walker, in three colors, and shows the working closs storming the ramparts of capitalism, planting the shood-red banner of Nocielism high on the fort. A brawny comrade, contiess and haties, has gained the crest. Behind him, and pressing close, is the united army of awakened workers. The bicture is symbolical, depicting the recent Socialist gains all over the ration.

The Appeal calendar begins counting time on May 1st, the great international labor day. It makes no pause at January 1, but continues up to April 30, 1912. The calendar comes free for a club of five subs, sent in at one time, and order for five sub cards or with a \$1.25 contribution to the work of the Agitation League.

the APPEAL to the unconverted. coast to coast and from up in the Canadian provinces to the Mexican line class conscious farmers are tilling the soil, tending crops, pruning tres, car-ing for stock, cultivating bees, setting hens, using every means known to the farm, for the advancement of Socialism

It all came about in this way: For years Socialist farmers have written the Appeal that, much to their re-gret, they could not hustle for subs in the spring and summer because plow. Girard, Kans." the spring and summer because plowing, cultivating and harvesting required all their time. In the winter these same comrades sent regular lists of subscribers. Out of their letters, grew the plan. It was begun about three months sent to all who engage in the farm camera.

placed in the APPEAL. Farmers who were thoroughly class conscious, who realized that they were members of the working class and would be willing do something special for Socialism for the APPEAL were invited to send their names to the Farmers' department.

No hint of the actual plan was given Names poured in. They were saved for two months and then the following letter was sent them

Dear Farmer Comrade: This letter answers yours to the Farm-This letter answers yours to the Fermers' Dep't.

Every spring and summer comrades who farm write me that they'd like to help out in the work but must put in all their time tending crops. Comrades on the industrial field can, and do, agitate constantly; at best the most revolutionary farmer can devote little more than half a year to propaganda. I have come to believe that this is the reason why Socialism makes greater headway among the industrial classes than among farmers. The purpose of this letter is to outline a plan for making Socialist farmers all-the year-round agitators.

dustrial classes than among farmers. The purpose of this letter is to outline a plan for making Socialist farmers all-theyear-round agitators.

The plan is this: For you to plan an acre or fraction of an acre, give it the same attention you devote to other acres whose product will enrich the capitalist class, harvest the crop, sell it, and turn the proceeds to sub carda. These cards will be used by you for sending the Arreat to other farmers. If you do this it will mean giving the Arreat free rent on an acre or less, donating to the movement the labor involved in raising the crop—and putting the Arreat. Into thousands of see all stands and making thousands of Socialists among farmers.

Spreial sub cards will be malled you for the full amount you send as proceeds from your Socialist crop. When these cards are returned to the Arreat the new subscriber will not only get the Arreat for forty weeks but additional literature specially prepared for converting farmers.

When your Socialist crop is in the ground every rain that falls will be helping the social revolution: every growing day will hasten the time when workers on farm and in mill will receive the full value of their toil; every onnee of energy you put into that particular patch will advance the day when you and your children will pay tribute to no master. It means sowing Socialism in the field, keeping down the weeds, cultivating it and finally reaping freedom from exploitation.

Capitalism hanks on the "solid farmer vote." Let the Arreat announce that any considerable number of acres are being cultivated to advance Socialism and the effect will be electrifying. It will make non-Socialist farmers think when every other means would fail. If the plan meets with your approval please think will make non-Socialist farmers think when every other means would fail. If the plan meets with your approvar please the full security of this page.

A Wonderful Story

I have just finished reading the manuscript of the best Socialist propaganda article that I ever saw. have been reading Socialist MSS for more than ten years and to me such reading is usually just hard work. This is the first one I have seen for years that I read through with intense interest from beginning to end.

It was the story of what is being done at Panama, written by "Albert Edwards," a Socialist of long standing and a writer whose work is familiar to all readers of the leading magazines. He tells how the government is running railroads, department stores, hotels, amusements, boarding houses, ice plants and a host of other industries. Here you have everything about Socialism except the one big essential of democratic management, and we all know how to get that essential.

Do you know that Panama is the only place on the civilized earth where prices have not risen during recent years? Do you know that meat and clothing and a host of other things are sold there cheaper than in the United States where they are manufactured? Do you know that ice is cheaper down there next door to the equator than it is in New York or Chicago or any other American city? Do you know that with all this cheapness

this country sell 200,000 copies of the Coming Nation containing that article, and if we tell the APPEAL readers about it

they will want that number.

We have not yet decided in just what Morgan got into the Hudson Bay comnumber it will appear as we are gathering a lot of splendid photographs to illustrate it. But you can send in or-ders at any time and watch the APPEAL for the exact date. It will be sold in bundles of ten or more for 21-2 cents a copy. Say you want the copy with the "Wonderful Story," and the Fairy will send you the right issue. Address the Coming Nation, Girard, Kan.

candid public that if the charges made by the APPEAL are true, then those prominent in the administration of government affairs" in Leavenworth peed to be attacked. There is no place in the United States for a bastile that is worse than the "Black Hole of Calcutta"

A cory of this issue of the Appeal A cory of this assue of the Arrana, will be sent under registered mail to President Taft and to officials of the department of justice. Copies will also be sent under first-class postage to all senators and congressmen. Washington will know what is going on in the model prison. If congress refuses to act the responsibility is theirs, not ours.

The attitude of the American press toward the Diaz administration has changed remarkably within the past few weeks. Concerning the concessions which the dictator in a message expressed himself as willing to make, the New York Tribine says, "revolution is prescribed in Mexico as an antidote between the pittsburg Chronicle-Telegraph sees in the message "a confession of practically all that the revolutionaries have charged against Diaz, and that he is unworthy of the authority vested in him." The Providence Journal thinks. "Diaz's career has been dimmed by his resistance to or failure to grasp more quickly the movement against established order." The New York Evening Post thinks he made the mistake of yielding but not yielding enough, while another castern paper suggests that "after this, the Mexican dictator has no alternative but to resign." It is a vindication for the APRIAL to find capitalist papers expressly declaring that all it said about Diaz was true if is the more remarkable because a year ago they vehemently denied the charges. That they should demand the retirement of the dictator indicates a new aspect of American capitalism toward him. That this should come after he has expressly instified Taff's massing of troops on the border as a warning that he must keep the peace, and that after Diaz has made greater concessions than he ever dreamed of before the insurgents should reject his terms, proves a change, and must have been painfully humilating to the man who had been an oriental tyrant for forty years. Honolulu and California papers are full of it. The sugar trust has been colonizing the Hiwaiian islands with Japanese and contract laborers from the Philippines until they constitute the bulk of the workers there. The condi-tion of these laborers has become prac-tically that of slavery. The United tically that of slavery. The United Press describes it in this manner; the words being quoted from a report made by the immigration commission, having therefore an authoritative aspect:

him not. In a hundred years the world will sit at his feet and love him because the people will have then learned that this man gave all of his great love to the whole world."

The majority of the inhabitants of the islands are vassals, working long hours for the starvation wages paid by the sugar planters. These planters do not wish furopean or American labor. They are doing all they can to orientalize the islands and are forcing out all other immigrants. As a result of this policy the Pacific slope states are receiving hundreds of undestrable allens who scoper or later will become objects of public charity. That is part of the slavery. It is so bad that they who recently were called heathen are anxious to escape it. smelter trust is taking advantage of this situation to contract with them for work in the salmon canneries of Alaska, and has actually stolen boatloads of the sugar trust slaves.
