an office since.
Today Roosevelt is put up by the capitalist interest as Bryan was sixteen years ago for the purpose of breaking up the party of protest; that is, the Socialist party.

This is made clear by an edito rial in the Philadelphia North American, which says:

"The progressive platform proposes measures which will make apitalism more secure against attack and discontent by removing the injustice that has grown up in the system. Socialism would destroy capitalism altogether by abolishing profits. It will check the growth of Socialism. It will have the immediate effect of taking from the Socialist's strength that great body of followers who are not Socialists at all, but who join the movement as a protest against abuses which, at that time, they

Populism was killed by Mr.

Bryan as a party, but the principles that it appropriate that it are the principles that t ples that it enunciated have been embodied in the platform of all the parties this year; therefore, populism was not really slain. The progressive movement may briefly hamper the progress of Socialism, vet it itself will be forced to advance to the point where its members will become Socialists. It is a logic of events. It is the order of evolution. You can't stop evo-lution with the capitalist system. It must go on continually until it develops out of capitalism into some-thing higher and better, or into socialized industry.

DODGING THE BOND HOLDER

There is a story going the rounds of the capitalist press in this part of the country as follows:

A county in Oregon wished to make extensive improvements in the way of road work and thought of bonding the county for \$1,500, 000. They found that the amount which would have to be paid back at the end of twenty years was so great that the plan was dropped. A man named Scott came forward with a plan which the papers say has caused widespread interest in financial circles, as follows:

The county in question should organize itself into a tax-payers national bank; issue bonds with the entire real estate and improvements of the county as security; place these bonds with the government as security for the loan of \$1,500,-With a small addition to the taxes the amount could be wiped out in the time allowed. The bonds bank disorganized.

This idea, if carried out, would, of course, do away with bond commission houses and would soon save the people an enormous amount in interest.

If banking was socialized all bond issues would be needless.

CAPITALISM A FAILURE. It is given out that \$366,000,000 were lost in wages through over 13,400,000 cases of sickness among wage earners in the United States last year. This is an appalling situation, considering that most of the

sickness consisted of occupational diseases and might have been prevented except for the profit system: However, the statement is misleading. The capitalist system is such that, had these men been per-mitted to work all the time, others who did work would have been thrown out of employment. The fact is there was no more financial loss to society in general through

this outrage than there would have been had their been absolutely no Capitalism cannot and will not employ all the people. If it did the people would demand and soon get their full product. It becomes, fore, the most wasteful system

The Coming Change

The transformation of scattered pri-ate property, arising from individual abor, into capitalist private property. labor, into capitalist private property, is, naturally, a process incomparably more protracted, violent and difficult than the transformation of the capitalistic private property, already practically resting on a socialized production, into socialized property. In the former case we had the expropriation of the masses of the people by a few usurpers; in the latter, we have the expropriation of a few usurpers by the mass of the people—Karl Marx.

Graft by the Billion.

In a single generation the spreading of new population over new lands has taken wealth from labor, and has given bonuses to landfords and tenants, by the thousands of millions of dollars. Small gains and great ones were to be secured by the mere ability to grab a desirable location upon free soil, squatupon it, and wait to discover if the destrable iccation upon free soil, squai-upon it, and wait to discover if the progress of the country would make improvements profitable, and, by getting there first, be able to prevent all such progress unless most of the profit be given up to secure land upon which to make improvements. Consider the efpeople in thus awarding prizes that aggregate billions of dollars to men who are first to interfere with progress, and who are first to promote the unequal distribution of wealth.—Henry Rawie,

Says the Daily Stor, Guthrie, Okla: "The two editors, Warren and Way-land, are now immensely wealthy, whereas, a few years ago they were poor, struggling newspaper men. With the money squeezed from the dupes, Warren invested his money in zinc land. He, who was once a penniless printer, built and owned a whole town." (If you want to share in the wealth Warren and Wayland have accumulated in the zinc industry in accumulated in the zinc industry in Missouri, read our offer on the fourth page of this issue. Then you will have a merry ha! ha! on some of poking fun at you because you have been putting up two-bit subscriptions to the APPEAL.)

Let Us Bring Our Jobs Back Home

C APITALISM has carried the jobs away from our homes. It has forced us to leave the dear old mother and gather into towns and cities far away from the dearly beloved old home-nest of our youth and early manhood. The capitalists must make money off of the great machines which we have invented, the patent on which have been sold to them for a pittance. To do this, they must build great in-dustrial plants, in which many thous-ands of workers must be made to cooperate with one another, to save ex-penses. This means that our children must go to these plants to get the jobs ve did on the old farm, before the inwe do of these fabor saving machines. This means life for our children in the crowded hovels of Lowell, or Liverpool, and a sad and lonely existence for our parents at the old homes. This means the breaking of every tie that binds the family together and makes "home" the most sacred spot on earth.

Upon reading the article from which the above is an excerpt it occurred to me that under the present system of ownership the air is about as effectively bottled (privately owned and controlled) as it well could be were it possible to actually store it and sell it.

Vous say you are opposed to Socialism because it would deprive the capitalists of their r ghts? Well have they ever cared for your rights? Capitalists, for profit, destroy the forests and cause floods that drown hundreds of people. For profit, they build unsafe dam: that break and kill hundreds more.

For profit, they build flimsy ships that mayal architects would not sail in and

naval architects would not sail in and which sink and drown the workers in the steerage while the parasites in the first cabin escape.

For profit they maintain tinsafe rail-roads because it is cheaper to kill 7,-too people a year than to buy safe rails, train stops and eliminate the grade

crossings.

For profit, they fail to sprinkle the dust in coal mines and use deadly electric power, because it is cheaper to bill inners than to sprinkle the dust and use compressed air power which used to save the lives of entombed

Economic Salvation.

The reason why you should wate the Socialist ticket is that it is the only reconomic salvation of the working class. Vanderhilt once said to his son: "My son, the man that takes his 7 per cent will in time have all the wealth of the world! Any working man or even a small business man that conceives the idea that he can beat the per cent game out has another think coming. It is the per cent game that takes the profit out of industry; that leaves the worker 17 per cent of the production and gives to the per cent taker 8a per cent. When this rate of the distribution of the reto the per cent taker 83 per cent. When this rato of the distribution of the results of industry is driven home to the worker all the power of the political parties, churches and press cannot stop the destruction of the per cent game. When this fact is driven home to the worker the time has arrived when the expropriator will be expropriated, and labor will come into its own. Vote the Socialist ticket because it is the only chance you or your children have for emancipation from economic slattery.

by the score.

For profit, they forced, by war, opium and death upon China and slavery upon the Filipinos.

For, profit, they maintain unhealthful shops full of unsafe machines at which your hunger forces you to lahor, and at which hundreds of you are killed every year. For it is cheaper for the capitalists to kill the workers than to put safety devices on machines.

For profit, they buy up the courts so you can have no recourse at law for damages.

For profit, they organize the dregs of society into army, militia and police to murder you if you try to better your condition by strike.

The crimes they have committed for profit would cover a million pages. Then why should you fear that their rights may be endangered? Have they not degraded themselves to a level where they have no rights that a working man is bound to respect.

Requires Slaves.

The Age Doth Compel.

We are living in a collective age. We are living in an age when all things are done on a large scale. Individualism in production and distribution has gene and forever. Labor now is employed in large hodies. Co-operation, is the order in large hodies. Co-operation, is the order in large hodies. Co-operation, is the collective machines, and the miles, the shops, the mills, the factories, on the railroads, the steam vessels and even on the land this idea is dominant, this idea of collectives mad co-operation. All that Socialism will change in this is that labor shall co-operate at its own collective machines and on its own collectively owned earth for itself instead of for the capitalists who now own and dispoil the earth for profit sake, who coin the lives of the workers into dollars and yet unsatisfied they seek the home and drag the mothers and daughters into their institutions of bondage and with them they bring the little ones to darken their lives forever.

This great change will free the masters as well as the slaves from this shame of the ages. It will bring life and love and hope to all. Labor will become a noble thing instead of an ignoble thing. The hand of fellowship will extend 'round the world. Every man will learn to freely feel that "every atom; belonging to me as much belongs to you."

The Disturbed Game.

The Elephant and Donkey had been playing the game they loved so well for the anusement of Uncle Sam, when a Buil Moose charged in on them and ran them both to corners.

"Go 'way," brayed the Donkey. "You disturb us."

"Go way," trumpeted the Elephant, waddling leisurely to one side. "I wish to ponder the problems of thus and so, and three is a crowd—always."

But the Bull Moose laughed and butted them both in the sides.

"Reckon I'll' tackle him," said Uncle Sam, seeing how his diversion was being interfered with. Forthwith he stepped into the ring, and was promptly pitched to the top of a big tree. From this point of vantage he surveyed the situation and them exclaimed:

rialism in brief is this: The colmean the common ownership of all things but only of such things as are socially used. The idea of this soaccess to the means of employment, and so end the exploitation that comes of private control of these things. With profit, interest and rent gone, things which belong with private control and do not with collective ownership, the workers of the world will speedily become opulent and the shirkers will have to go to work. Under Socialism, if banking ras made a public business, the funds or local banks ar postoffice saving banks. The postoffice saving banks. The postoffice saving banks. The postoffice saving banks. The postoffice department is now so carefully conducted that there can't be a loss of a penny without it being discovered and traced to the party in fault. It would be so under Socialism. There would be so under Socialism. There would be no great amount of public funds required to do the work in any one place because these funds would be continually coming from the people in the way of deposits and being returned to the people in the way of payment for services. Under such conditions embezzlement would be far more difficult than at present, not to speak of the fact that under Socialism, where everybody received his full social product, there would be no need of swindle in order to live well.

Would the red flag be the only flag under Socialism or could the stars and stripes be used? The red flag is an international emblem. You can't use the stars and stripes in Germany or England, today but you can use the red flag. If you was to carry the English flag in a procession in America they would call you a traitor, but the stars and stripes would doubtless be used in America under Socialism. Socialists use it today. A great deal of nonsense is talked about the red flag. Symbols are not so important as the real thing anyhow. This is now being put on in Kansas, and we can speak from experience when we say that it is a profound success. Under the head of the caption used above, the New York Sig. has the following to say of Comrade Walker, and his work:

"Ryan Walker, the brilliant and original American artist who for three years was connected with the New York Sig., as cartoniet is going to cut some figure in the present presidential campaign. Mr. Walker, who has been chief cartonist on the Argait to Reakon, the national Socialist organ, has arranged a pleture entertainment, which will be presented by Mr. Walker in person, as a means of spreading Socialist proparands. Mr. Walker will use his own cartoons, which made in full view of the audlence, will be thrown on a huge canvas Mr. Walker is not working merely for pelf, sithough he probably is the highest priced and most noted artist doing this class of work. He is a firm believer in Socialism, and his platform work is a labor of love and conviction."

Comrade Walker will make a tour of some of the central states in October, Locals destring to know more about this plan should write us immediately.

Just to show that the APPLAL appreciates the work you do for it, we secasionally give out a few prises. The intrinsic value of these prises is not much but the books we send you are the best we can buy. We are still sending to each of the ten commides who send in the larguest lists for the week a copy of Kirknatrick's "War-What For? This book is published by the author at L. B. 473 Madison Square Station, N. L. and sells for \$1.20. It's the hottest thinn to print-aside from the APPLAL—and one copy in a community has been known to act as an antidote for all the lincolsm that all the local politicians can work up in a year. Here are the prize winners and the number of subscriptions they sent in last week.

ASKING FOR A PROGRAM. There is a great deal of demand

that the Socialists give a program of exactly what they will do when they come into power. It must be understood that Socialism is not a program but a method. It merely purposes to give the people control of their lives politically and industrially. In this respect it is merely democracy extended into the field of industry. When the people get into power it is assumed that they will use that power in their own interest. As to what they will do with it it would be presumptuous for any person to say. Socialists are educating the people to an understanding that an end of the profit system is necessary. Further than this the profit, system itself is bringing about its own de-struction. For these reasons it is obvious that when Socialism gets into power the people will destroy the profit system and establish industrial democracy, which is the only means by which they can actnally rule. Conditions always make the program. The Socialist party has, in its platform, outlined a program for the immediate relief. To go ahead and to say just what is to be done first when Socialism comes fully into power is merely a case of crossing the bridge before you get to it. It is an impossible thing to do. They who do ask it betray a symptom of insincerity and a desire to find fault without

ROOSEVELT is not even an original thief. He stole his idea of lighting Socialism by stealing a few planks from their platform, from Lloyd-George, the English liberal leader, who is just now fooling the English workers with sham reforms. In the current issue of the Coming Nation Shaw Desmond tells the real story of Lloyd-Georgeism. He shows how the British worker is fed on political red-herrings and the thin East wind of promised reform, but shot with real bullets and hammered with real clubs and starved with real hunger when he asks for more wages. He shows how the women were fooled with promises of suffrage and then how the suffragists were imprisoned and forcibly fed. This article is a forecast of the realization of the Rooseveltian pro-

Talks With Voters

Someone asks why the Socialists pay campaign, and especially a campaign of agitation and education. Socialists, de-claring for the overthrow of the capifrom the capitalists and would not re-ceive it if they could, because it would mean compromise. The only way for them to secure funds is by the contri-butions of the poor. The dues paying system has been devised as a means of enabling the workers to own, control and finance their party. A man may vote the Socialist ticket without joining the narty, but the earnest Socialist under-stands that, while his own ballot counts for much, he has a duty to perform be-sides voting—he should educate and in-duce others to vote that ticket. It can be done only through organization and giving to the cause. Therefore, the carnest Socialist will become a dues-paying member of the Socialist party.

Socialists should never vote for the good men on the old tickets. At pri-mary elections they should never vote for a candidate of either of the old parties. When they do that they nominate that candidate on the Socialist ticket and he has a right to have printed on the Socialist ticket his name as a candi-date.
