On this basis the actual in vasion might be completed within six months. How much longer the occupation of Mexican territory would be necessary completely to restore peace belongs to the realm of prophecy.

An invasion of 560,000 men, lasting for six months, it is believed, would approximate a cost of \$350,000 000-almost This is an allowance \$2,000,000 a day. of a little more than \$100 per month per man-a conservative per capita cost to put such an army in active service and some as yet unsated pleasure. keep it moving.

At the end of six months, if the work of invasion were over, there would gence devote themselves to "culture." probably be left of the invading force 300,000 men. It seems cruel to speak in such cold terms of the toll of death, and wounds, and illness, and desertion. But war department statistics record under the head of "deterioration" a percentage of between 50 and 60 per cent for the first six months for even such force. Converting these 300,000 men into a static army of occupation in a foreign land, it is estimated, would require an outlay of about \$150,000,000 for six month-an average of about \$500 per man. And if at the end of the year it would still require 300,000 men for another year that would mean another toll of \$300,000,000.

For occupation of territory so vast as that of Mexico would require scores of heavy garrisons in all the capitals of the Mexican states and in the strategic points that command the lines of nication between them.

SELFISHNESS HELPS

Edward F. Adams in his "The Inhu nanity of Socialism" says: "Human elfishness is the hope of the race." Adams is right. Socialism is being humanity alone, but also through love As men study and understand Socialism they know they will be better off under Socialism and they become Socialists. Every normal man wants to be happy and under capitalism he struggles to achieve happiness for himself alone, but slowly, but surely, it is dawning on the intelligent man that only a limited few can achieve anything approaching happiness under the present system; he finds in order to achieve happiness for himself he must help others achieve it. A Socialist workingman works and votes to better his class because he knows that is the only way covered that their selfishness must be broader and more intelligent than any clude the whole human race.
