O H wondrous Epic! Who shall ever fully sing it? Who shall paint its outlines in their vast extent? Dramatic, vital, tense, the story of the Appeal needs a more powerful hand than mine for the telling. Yet even I can understand how many a man walks the earth today in freedom, who without aid of the Appeal had long ere now been immured in a foul cell, or swung from hemp and flung into a box of pine to moulder under six black feet of earth.-From England's "Story of the Appeal." - See page 3

God's Chosen People.

Such is typical rural life according to editors who live in the city. One of these, if I remember correctly, even had the twentieth century agriculturist shaving every day, instead of every week, as of yore. And no exception was made of the cotton farmer. At this very moment a printed letter is being circulated widely in the south in which the writer (not a farmer) singles out the class which raises cotton as "GOD'S CHOSEN PEOPLE."

Possibly I am unfortunate in mychoice of a starting point; but I have to confess that I am still looking for those automobiles, those modern homes, those other appurtenances of civilization mentioned, also for the bank books!

There are automobiles in Carter county—yees. But in all the miles I have traveled I doubt if I saw as many as, twenty on the country roads. And not one of these was driven by a working farmer. There may be a farmer who farms land in these parts who rides to church in an automobile, but I am yet to hear of him.

There are automobiles, plenty of them hank books!

Censors, Editors and Liars

F justice were to be done, almost every American newspaper editor

would be in jail. American newspaper editors, at the present moment, are committing a great crime against the American peo-They are not only liars, but they are double-decked liars, because they are asserting the false and suppressing the truth.

Now, let us get down to particulars. American newspaper editors are tremendously exercised about the press censorship established over can newspaper editors clamor loudly for the light. They say the people have a right to know the truth. They say the suppression of the truth is both criminal and stupid. Having said which, American newspaper editors stop. They have not a word to say about the censorship they have not a word to say about the censorship they have not a word to say about the great danger of means the say burden upon as comrade. war news by foreign governments. With regard to war news, Amerihave not a word to say about the great danger of unparalleled hunger that confronts this country. Daily they chronicle, on their market pages, brief items about the amount of foodstuffs exported the day before, but they never accompany such announcements with explanations of what they mean. They never say: "Our country is being stripped of food that we shall soon need." They never say: "Our rich men are becoming richer by taking away poor men's food and selling it at a high price." American newspapers simply print the facts with regard to food exports-print them in small type for food speculators to read and without an explanation of their true significance. Nor do they stop there. Everybody knows that business conditions

in this country are about as bad as they could be. Except for the gentlemen who are making shrapnel and army shoes for Europe, there is little that might be truthfully described as industrial activity. Everywhere, factories are closed or running on part time. The railroads have taken off many of their trains. The steel trust is running at vastly reduced speed. Even the Detroit automobile manufacturers are up against it for the first time. The automobile manufacturers are prosperous all through the lean years since 1907, but they are not prosperous now. I know, because I have just been in Detroit and have taked with men who know the truth. I have taked with newspaper men who know the truth. These newspaper men told me that the automobile business in Detroit was becoming stagnant. Only one of the big plants is running its full force. Thousands are out of work. Everyone in Detroit knows this to be true. Yet the newspapers suppress the truth and print guff about good times.

Panles, some of the stockholders in my hinch were resident and others living in the gland at to get all possible out of the working settler. to me, "what would you think of a man who would tell the people how bad times are?"

A newspaper editor, with more intelligence than the cartoonist, commented differently. He said to me: "You know the newspapers are all talking prosperity, don't you? The advertisers want them to. The workers, when were induced to interest the people how the people h all talking prosperity, don't you? The advertisers want them to. The advertisers want them to. Which is the truth. The advertisers control almost all of the newspapers in body-boots-and-breeches fashion. I would not say that all newspapers are thus controlled. Perhaps I should say so. But this much at least is true: I believe I have a fair knowledge of the great newspapers of the country, and there are fewer than half a dozen that I would even suspect of being above the influence of advertisers.

But with all this provision for exploitation, farming was not at first profitable. In New England fisheries and fur taking brought quicker returns. The wife spun and wove cloth, and the husband rived staves from forest trees that brought ready cash

SO MUCH FOR THE LIE that consists of suppressing the truth about business conditions. These newspaper liars do not stop at suppressing the truth. They proclaim the false. A New York newspaper, a few days ago, announced in large headlines that "Prosperity Is Here and More Is on the Way." A few days later, in Chicago, I noted that the Chicago Tribune devoted an entire page to a proclamation, in advertising type, that good times had come back with a rush. Business men were urged to "Accept Prosperity as a Fact." Statement was piled upon statement in an apparent effort to hypnotise readers into the belief that everybody had plenty of work and plenty of money. that everybody had plenty of work and plenty of money.

Of course, some allowances should be made for the limitations of these gentlemen. Like everybody else, they want good times. Unfortunately they have not the remotest idea of how to bring good times. Every remedy they have advocated having failed, they have finally Every remedy they have advocated having failed, they have finally vator fallen back upon the desperate experiment of trying to bring back good velopment of the business and the

times by proclaiming that good times are already here.

If we are a nation of imbeciles, of course this is all right. This is all right if newspapers are mere amusement sheets that have no serious place in a republic. But if newspapers have a serious function to perform in a republic, such lying is not all right. If the people are to rule, they can rule no more wisely than their knowledge enables hem upon facts they, of course, vote like fools and make no outcry when congress fiddles with trifles. They cannot vote otherwise. Mr. Rockefeller could not intelligently manage his great enterprises if he were always compelled to act upon the basis of guff. Without facts, Mr. Rockefeller would also act in businesss like a fool.

The time will come when newspaper editors that suppress impor-

tant facts and print lies will be sent to jail. They will be sent to jail on the theory that they are weakening the foundations of republican government by polluting the information upon which voters make up their minds.

Hawaii, An International Crime

Editor's Note.—We take pleasure in announcing a remarkable series of articles on a subject that is both timely and vital. Our national ownership of Hawaii threatens the power of this country. H. G. Creel, formerly associated with this paper, has just returned from the islands and brought with him facts and photographs that will startle this country when they are published. Creel will not only arouse the people through the columns of this paper to the serious international complications that the ownership of Hawaii is aggravating, but will asson tour the country in behalf of the Appeal delivering lectures on Hawaii and Japan, illustrated with stereopticon and motion pictures. In regard to this tour the Appeal will make a full announcement in an early issue. We urge you to read Creel's story—it is in your interest that his story is published.

What Fools Workingmen Must Seem to Be

A GREAT politician has again determined to do something great for labor. When a great politician wants to do something great for labor, he usually appoints a commission to do it. Mr. Roosevelt appointed a commission to settle the anthracite coal strike in 1902, and had it settled.

Mr. Wilson now wants to settle the Rockefeller strike in Colorado. Mr. Wilson has appointed a commission to settle it. One of the commissioners is Patrick Gilday, an official of the miners' union; another missioners is Patrick Gilday, an official of the miners' union; another missioners is Patrick Gilday, an official of the miners' union; another is Charles W. Mills, a Pennsylvania coal mine owner, and the third is Seth Low, a rich, blue-blooded former mayor of New York.

Now, on the face of things, Mr. Wilson has provided the ingredicated in Hawaii with this difference: The Japanese government, instead of

The fiction is that we annexed the Hawaiian Islands fourteen years ago. The planters have a different and more accurate version. They say that they "annexed the United States."

And that is exactly what happened. I believe that laws, unless they represent a change in habits of thought induced to take them over in 1900. At the present moment it is costing our government eight million dollars a year, \$22,000 a day, just to keep soldiers; in Hawaii. This case action the dependent wife to that endured by the day laborer, will be ended.

I believe that laws, unless they represent a change in habits of thought office they are absolutely worthless. Often they are absolutely worthless.

Labor legislation is useful. A change in society can only come from a year, \$22,000 a day, just to keep soldiers in Hawaii. This says nothing of tremendous sums constantly spent for fortifications and more fortifica-

War Is "Legalized Murder."

And all of it is futile. Both military and naval officers admitted to me that when Japan is ready she will take the islands. Said an artillery captain to me: "There are eighty thousan? Japanese on the islands. Thirty-five per cent of them admit having had military or naval training. The planters have treated them cruelly. The Japanese smile, but there's the gleam of death back of that grin. Our guns are pointed at sea and the enemy is inside. When the time comes we'll fight, of course. But in the end we shall lose and for the fighting men on both sides it will be 'legalized murder.' Those were his exact words, "legalized murder."

Before the world war there was a chance that the United States, at an awful toll of ships and men, could avactate the planters from the just advantage of life and hooks. And all of it is futile. Both mili-

Not even the most confirmed jingoist will contend that the Hawaiian Islands are worth anything to us except as a naval base in protecting the Philippines. The Philippines are valueless except as a base in protecting Hawaii. And when you have read the hitherto unwritten history of Hawaii, the conscienceless methods adopted by a handful of commercial birates, the intrigue of the planters and their snobbish dislike for what was a saferce struggle for a frail young girl of 18. I do not expect you to endorse this until you have read and weighed the evidence that the APPEAL will present. That you may have the fullest understanding of all the causes that lead up to the impending crisis the articles will begin next week with a brief history of early Hawaii with photographs of natives in primitive costume, showing and telling how the people lived before the white man came, their manners, customs, religious ceremonies, etc. In succeeding chapters you shall learn of the landing of the missionaries, their influence on native government, the beence on native government, the be-rinning of industrial development, the fading away of the native population from 400,000 in 1778 to less than 30,-700 at present, the importation and enslavement of plantation workers the degradation of women on the islands and finally the righteous rage of Japan and how the pla

H AVE you ever met a former schoolmate, a pal, warmed to the smile on his face, tingled as you clasped his hand and choked down a clasped his hand and choked down a lump as he slapped your back, calling the boyhood nickname? You remember how it was: Together you went over the old days, the games played, the trials you had, the joys and the troubles you share, particularly that time when you two, shoulder to shoulder, stood off a whole gang—"and licked "em." Incidents, precious to both of you, had slipped out of mind, but with that meeting they returned, clear and distinct, and both your eyes glowed as the past blent into the present.

clear and distinct, and both your eyes glowed as the past blent into the present.

That's the way "The Story of the APPEAL" affects a war horse of the social revolution. If you, Mr. Reader, have had any part in the struggle for social justice during the past 20 years this book contains memories that will thrill every atom of your being. The APPEAL has been in the forefront of every great industrial and political struggle in the last two decades. You had a part in some or all of them—and your part is recorded. All of the past, the almost forgotten past for some of us, comes in review. This book will play on the heartstrings of thousands of men and women as no other volume has ever done.

George Allan England tells the story from the very beginning down to the present. Nothing is omitted. The 21 chapters and the appendix cover every incident, great and small, in the history of the most remarkable newspaper in existence. Wayland's early struggles are told, his conversion to Socialism and the launching of his first Socialist paper. The choicest of his pithy writings are reproduced. The history of the Tennessee colony. Warren's entrance into Appeal destinies. The Moyer-Haywood fight. The victory. The Governor Taylor case. Warren's indictment. The long years of struggle, court intrigue, "frame ups" to "get" the Appeal—all of it is related with such directness that when readgy ou seem to be back in the thick it. And then the judicial fight, the Grosscup, Phillips and Pollock cases, not forgetting our old friend, Harry Bone. That was one of the dark times when you and the APPEAL stood shoulder to shoulder, stood off a gang—"and licked 'em."

The Leavenworth case—you remember that. All the forces of depravity lined up to crush the paper that exposed conditions in the federal prison so revolting that no effort was made to fully describe them. The work of the Army, the most spectacular of its campaigns and its repeated victories are enough to fire the blood of a stone image.

The scope of the APPEAL; the greatest of its editions; hitherto unknown incidents connected with them; how the paper is printed, addressed and mailed; the office machinery for taking care of subscriptions, etc., etc., form an interesting chapter, entitled "At Home with the APPEAL." Photos of the editorial staff, men and women, are reproduced as is a picture of the greatest press and its veteran pressman, "Old Chap," the man who printed the particular copy you're reading now and every other individual copy since the APPEAL started. There is no greater need among the working class than the ability to correctly read, write and speak the English language. There is nothing more humiliating for one who has an important message to convey to his fellow workers than to be utterly unable to couch the message in plain, simple, correct language. Our educational staff has just completed a course in English that is intended to meet the great need of the workers for a better use of language. The course is plain, simple and is furnished to the atudents at its absolute cost. If you want to learn how to use good English, spell correctly, be a good penman, converse fluently, prepare a good speech, write a good letter and enlarge your stock of words, write fer the literature of this great combination course of study.

A few days ago we received from the printer 2,000 copies of "THE STORY OF THE APPEAL," which George Allan England has spent more than a year ! writing. These books are bound in library red clotte and contain 307 pages of the most interesting story ever but between two covers, and six pages of illustrations and photographs. The original price set for this book was \$1.25. But in order to give it as wide circulation as in possible we have reduced it to a dollar, whice also pays for the postage.

I am writing you this letter in order that you will make use of this book as a Christmas gift to some Socialist friend whose heart will undoubtedly be cheered by it. Every Socialist would rather have this book as a Christmas gift than anything else we know of. The book is ready to be delivered by Uncle Sam to any address you choose. The time is short, so sit down and write us the name and address of the one you want the book sent to and enclose a dollar bill and we will do the rest. On this page you will find more about "THE STORY OF THE APPEAL" -but I presume if you are a reader of the Appeal you know exactly what is in this book and don't have to be urged to secure a copy either for yourself or some good Socialist friend.

Every morning for many months I got up at about five, cocked my breakfast and then bundled up for the long hike to my workshop in the forest, near Bryant's Pond, Maine. The amount of clothes I had to wear, to get there without losing fingers and toes, was astonishing. Mostly I also wore lumbermen's calked boots, on account of the ice.
