Great English Dramatist Says Best Plays Are "Immoral."

LONDON, July 30 .- Bernard Shaw the English playwright, this afternoon appeared on the witness stand before the committee that is inquiring into the question of dramatic censorship in England.

Shaw said that three of his nineteen plays had been prohibited by the English censor, and added that he objected to having his good name and his manner of livelihood "under the despotic control of the censor.'

The practice of stopping immora plays he greatly deplored, declaring it to by his opinion that "immoral" plays were the only plays that were worth

writing. He admitted that he was "a conscientiously immoral writer."

This is in line with the position always taken in his published writings. that the existing standards of morality therefore any purposeful and progres-sive play must attack these standards

and must therefore be "immoral." Shaw declared that when " America, the American theater-going the other manufactured products of public, knowing that many of the plays that are produced in England are indecent, thought that surely this play, which had made such a great hit

Conference Completes Work on Measure. Matters in Dispute Adjusted.

WASHINGTON, D. C., July 30 .- The conference report on the Aldrich-Payne- tariff bill, which will probably become a law in a few days, was sub mitted in the House of Representatives today by Representative Payne chairman of the House conferees Most of the important features of the eport have heretofore been published. The really important matters in dis-pute between the two houses were adjusted in the last few days of the conerence, largely on suggestions made

The duty on rough lumber is from \$2 in the existing law to \$1.25 in the new bill. It was one of the most obstinate matters with which the conference had to deal, and it was the last subject on which the conferees eached an agreement

In the House a determined effort-was made to put lumber on the free list, but it was frustrated through the aid of the votes of Southern Demo-crats and by a combination of Representatives who were in favor of free hides with those who desired protection for lumber. As the rate finally passed the House it was fixed at \$1. The Senate increased it to \$1.50, many The Senate increases it to save in the pass this examination site is then paid Democratic Senators voting with the if she is successful she is then paid Republicans, and the conference that \$1.50 g day for her work as printer's two rates and accepted it as a fair

Hides was another subject of contention which was finally settled by the intervention of the President. The existing law carried a duty of 15. The existing law carried a duty of 10-per cent on hides. The House put them on the free list, and the Senate restored the 15 per cent duty. The report submitted today puts them on the free list with corresponding reducleather.

The plate printer's daily compensation depends upon the num-ber of sheets he can print in a day He must look out for his interests and very naturally works as fast as he can. The girl is of course timid and nervous. She is continually im-pressed with the great responsibility of her task in handling this money

More than this, the skill with which proper position upon the press each time determines largely the success of the printing. She must examine sheet as she takes it off and i the printer if there is the slightest defect In her work she is driven by n

carriages into the broiling sun.

Cassult is twenty-seven years of and back again, standing on her feet age and is a shoemaker by trade. To-continually during the half-day's continually during the half-day's work. This turning back and forth produces grooves and hollows in the floor where the girls must stand which ruin shoes and make the standing peculiarly intolerable to girls working under such mental strain, and pervous tension.

The girls are all given to under-stand that they must present a neat appearance and therefore wear white A few minutes' work will cause ink to spatter over the waist. It is absolutely impossible for the girl in turning from side to side to keep her skirt clean from the grease and dirt of the press which she must stand against. As a result. a day's work means that the skirt will be filled with grease and dirt Very naturally, it is impossible to wear these clothes upon the street. Shoes, skirts, waists, must all be changed upon coming in and going

This item of dress is a vital one to take into consideration in con-sidering the compensation which these women receive. It cannot be character of the work or in the com No eggs of dressing, with a departm Clothes are rapidly destroyed as a result of this work, and we will show tomorrow how even the street clothes of the girls are often necessarily

Coal Dealer and Inspector Charged With . Cheating the City.

George M. Kuhn, son of George J. Kuhn, a coal dealer, at 172d street and Webster avenue, and Hugh Martin, a former employe of the Park Department in the Bronx, were arrested yesterday by Detectives Fitzsimmons and Russo, of the District Attorney's office, on indictments charging atempted grand larceny.

The indictments were found on information furnished by Comptroller Metz shortly before he sailed for Europe.

Kuhn and his father have had a contract for supplying coal to several city departments in the Bronx. On March 26, the indictment charges, the son put in a bill to the Bronx Park Department for 102 tons of coal, and Martin, who had inspected the de-livery of the coal, certified that the amount was correct.

The Comptroller held up the bill They discovered, it is alleged, by measuring the coal that not more than fifty tons had been delivered.

MORGAN THE "PEERLESS CAP TAIN OF INDUSTRY.

With the advent of the year 1898 an epochal movement for the consolidation and centralized ownership of transportation systems, industries. The trust era was now in irresistible swing. After a warfare of nearly thirty years in the courts and in the present of fully \$18,000,000 was made active political and industrial arena to a few bankers already surfeited the middle class found itself completely frustrated.

A Decision Which Did Not Decide.

Eight years previously in 1890 what triumph had been secured in New York State. The courts there had declared the Sugar Trust illegal under the common law provision that no corporation, through its stockholders or otherwise, had pwer to give over its rights, powers and duties to a board of directors. (1) The middle class jubilantly declared

that no trust could survive so funda-mental and sweeping a decision. But new surprise was in store for that class. Instead of showing any trepidation or preparing for their dissolution, such trusts as were then in existence received the decision with most irritating equanimity and serenely proceeded

to perpetuate their corporate selves by donning a new legal garb. They not only continued to wax great and powerful, but the Sugar Trust, in particular, with the Havemeyers at its head, carried on continuously a colossal system of frauds upon the Government in the fraudulent weighing of the system of the syst imported sugar. These frauds excame public in 1909, that the amoun out of which the Government had beer defrauded reached fully \$9,000,000. (2) In addition to these monumental swindles the Sugar Trust continued so absolutely secure in its monopoly that it was easily able to crush all com-petitors, dictate tariff schedules, and extort, in the course of trade, an annual profit placed by some authorities at \$55,000,000 a year, or a total of \$660,000,000 in profits in the period from its organization down to 1909. The Middle Class Betrays Its Own

Speaking in a large political sense, a last stand was made by the middle class in the Presidential campaign of That was its great, although not really final, attempt to defeat the plu-tocracy and conquer the powers of government for its own policies. Under the leadership of Bryan the Demo cratic party declared itself radical and tremendously and sincerely earnest but its so-called radicalism was in essence a reactionary futile effort to extinguish the trusts and re-establish the old confusing competitive conditions in the production and distribu-

Spoiling to see the trusts harassed and overthrown, they yet could not resist the fear that their precious dollars would lose in value under a regime of "free silver."

> (2) This was an extremely conservaproved beyond dispute the commission each of which robbed it and equally of these great frauds, the American sought to keep it down. Sugar Refining Company paid more than \$2,000,000 to the Government in April, 1909, as restitution for its swindles. But this \$2,000,000 covered only a mere part of the long-continu-ing frauds. Early in May they came up with their goats and cows, and they stayed until October. They talked with no one in July and August, sometimes spoke "bad French, almost as bad as yours:" and they could not understand. Even among themselves they did not care to talk. One fellow had told stories that made you laugh till your eves grew wet; but, he had till your eves grew wet; but, he had alleft, had buried him in a hole and piled on heavy rocks to keep off "the vulture devils." As they spoke the vulture devils." As they spoke the vulture devils." As they spoke the thunder sounded now and then, not in claps, but in dull, sullen tones, making it easy to believe that demons were not far away.

We climbed the wet alope to the cabin. It was empty. It was dark and bare, with earthen floor, a rough log bench for sleeping, an iron pot, and as moldering fire, whence the soft white hissing amoke drifted up into the rafters. The rest was hidden in 35.

The Russian had gone in search of the youngsters. He came back smil-ing broadly, with a squealing little animal on each heavy shoulder. They were only mites of four and five, boy or girl you could not tell, so untamed and shaggy. And they were mightily scared. They squealed and scratched and pummeled, their black eyes glared like eyes of hawks, but we would not put them down. And gradually, with toothsome bits of chocolate and reassuring words, he soothed their rag-ing little souls, until at last they stared in solemn silence.

And now Shorty did a wicked thing.
He did it with a smile.

HOW MAYORS ARE MADE.

Last Saturday ex-Governor Benjamin B. Odell sailed for Europe. His departure was unexpected and surrounded in secrecy. Friends who had expected to meet him in this city on Saturday night were reported to have been greatly surprised when informed that

What was it that caused the former boss of the New York State Republican machine to sail away so hurriedly and so secretly? Mr. Odell is not known to be either a private detective or a government spy. According to common belief and knowledge he has practically been out of politics for some years past, ever since the control of the Republican state machine was wrested from his hands. If Mr. Odell had gone to Europe for his health, he would not have departed with either suddenness or secrecy.

According to a report in the New York Times the real cause of Mr. Odell's departure was a cablegram from Mr. Edward H. Harriman, who desired his old-time political lieutenant to come over to Austria, where Mr. Harriman is now taking the baths, in order to discuss with him the political situation in New York City. In political circles here it is no secret that, while the people of this city are disgusted with the Tammany administration, there is very little prospect of their being attracted to the Republican-Citizens' Union-Committee of One Hundred Million Dollars combination. But unless the people can be aroused against Tammany, the election is almost sure to go by default in favor of the "government," which in this city means Tammany.

The election of the Tammany ticket would not, it is true, be as great a misfortune to Mr. Harriman as might be supposed by the uninitiated. Mr. Harriman is a domineering sort of person, is in control of enormous sums of money, and generally knows how to get what he wants, whether from legislatures or courts, from Roosevelt or Diaz. We have no doubt that Mr. Harriman, if he chooses, has it in his power to dictate, through Mr. Odell, the Tammany nomination for Mayor. But that could be done even more easily if he should also be in a position to dictate the nomination of the reform combine through the same Mr. Odell. It would be easier and it would be safer, for, after all, a popular election is a gamble even to Mr. Harriman, though a Wall Street deal or a court decision is a certainty.

With the mayoralty affair in the strong hands of Mr. Harriman the people of New York may feel perfectly sure that no cheating will be done. The obligations which the candidates for Mayor will assume-to Mr. Harriman-they will carry out. The man whom President Roosevelt could not down stands in no danger of being cheated out of his honest dues by petty local politicians.

A DISGRACE TO OUR COUNTRY.

Employes of S. M. Frank & Co., pipe manufacturers of this city, are out on strike against their employers. They do not ask for years would help Socialism more than higher wages, although they are not in receipt of princely incomes. They do not ask for shorter hours, although their work is not exactly a frolic and they could stand a rest without injury to their health. In fact, their work is said to be of a somewhat dangerous nature, due to the generated dust which enters their lungs and predisposes them to consumptive diseases.

It is against this that they rebel. Hard work, long hours, short pay-these they put up with. They would even risk their health if there was no other way, for they are workingmen, soldiers in the industrial army, inured to risks and dangers. But there is another way. The soldier would be a fool who did not take shelter from bullets behind a tree or a rock. The officer would be pronounced incompetent who did not provide as far as possible for the health and safety of the men under him. But Frank & Co. refuse to install a blower that would carry off at least part of the dust and dirt and make it possible for their employes to live a few years longer. They refuse because they don't care whether their men live or die. They can at all times get as many new men as they need to replace those that have died. If they should be unable to get them in this country, they will get archist squad and made chief cen- and a receding brow. them from other countries. They don't have to buy them and they don't even have to train them, for the cost of their training falls on the men themselves.

One might think that a community boasting of its high civilization would have laws COMPELLING the introduction of every device for the safety and health of its workingmen that has been invented. From a Christian community, which takes the utmost care of the morals of its working people and does not permit them to buy a glass of beer on Sunday, one might even expect that it would OFFER RE-WARDS for the invention of such devices. But such things may pass in the effete monarchies of Europe. Such things may be demanded by crazy foreign Socialists. We, however, are Americans. We are Democrats or Republicans (Tammany Hall is both). We believe in individual freedom and initiative. Let the employers and the employes fight it out among themselves (if the courts and police do not interfere in favor of the stronger side) and let the best men win. Such things do not properly fall within the sphere of government, which should confine itself to the protection of life (by hanging the murderer) and property (by issuing injunctions against strikcrs).

The Citizens' Union is considering legal steps to force the acting comptroller to raze the rookeries that have been condemned for the approach of the new Manhattan Bridge. Have the respectable members of the Citizens' Union suddenly become solicitous for the health of the poor hobos who are compelled to sleep in these foul and verminous dens, and do they intend to provide for them clean and whole some sleeping places? Nothing of the sort. There are other and more potent reasons. The president of the Citizens' Union has no ferry for sale this year. He will, therefore, permit his organization to nominate an anti-Tammany ticket. Now these rookeries are used as lodging houses and furnish a large floating Tammany vote. The Cits, it is true, could purchase this vote if they paid for it a little more than Tammany. But the Cits are respectable cits, who don't besmirch their hands with such petty traffic. They only go in courts, legislatures, and political parties. Hence they are resolved that the rookeries must go.

LETTERS TO THE EDITOR

TRAITORS DEMAND ADMISSION

Editor of The Call:

My attention has been called to a letter appearing in the Sun of July 17. in which the writer, F. G. R. Gordon, makes the statement that The Call has refused to publish a letter from the writer, and also from Mr Noyes, and Mr. Lofthouse. He uses this as an argument to show that the Socialist press is just as illiberal as the capitalist press.

At a recent open air meeting that I addressed this article was shown to me, and I must admit for the first. time in my life I was frazzled and the effect of my speech was lost and my agitation for The Call received a hard

knock in the head on account of this.
Picase explain this, and oblige,
F. HUBSCHMITT.
Paterson, N. J., July 22, 1909.

[The present editor of this pape did not have to deal with the alleged letters which were refused publica-tion. But he is of so intolerant a disposition that he would surely have acted exactly as his predecessor did and rejected, without examination anything emanating from F. G. R. Gordon and others like him, who hav gone back to the fleshpot of capital-ism. We are perfectly willing to give in the columns of The Call hospitality to honorable opponents. But for traitors we have no room to spare.— Editor The Call.]

In appointing President Butler to be the intellectual fly-cop and learned plain clothes man to round up and corral the Socialist philosophy, Belmont has made np mistake. That President Butler will be faithful to his task there can be no doubt. Whether the'be strong enough to perform it—that is another question. Kings College, the' forerunner of Columbia University, got her letters patent from in Trinity church and stated the

Well, it was while Seth Low was Mayor of Greater New York that the police were used to CLUB Womed MEN during the meat and rent "riots" of the East Side. A perfect gentleman is Seth Low, an honor to Columbia. No doubt President Butler is a most worthy successor.

for educational than for other purposes.

When Rockefeller gives \$100.600.000 to supply Americans with knowledge, you may rest assured the knowledge supplied will be of a kind pleasing to Rockefeller. Out of Rockefellers billion dollars it seems to be the impression of many persons that he has given one hundred million dollars to teach the people to take from him his remaining nine hundred millions. Of late Rockefeller is said to have been cultivating a much needed sense of humor, but he will never do anything quite so funny as that.

Columbia University officials have shown their fidelity to capitalist interests both in the whirling present and the historic past, and August Belmont has made no mistake in choosing President Nicholas Murray Butler to supervise a literary attack on Socialism though it is true that

lege, the 'forerunner of Columbia' University, got her letters patent from Ising George II., her first endowment was half of some funds raised by lottery (the other half of which was used to build a pest house and a jail), and her first revenue came from the excise money of ginmill keepers. Columbia has as much right to be proud of her ancestry as a captain of industry has to glory in his original accumulation. Officially, Columbia's later estate has been worthy of its beginning, and Butler's fly-cop job bears out her noblest traditions.

As showing the position of Columbia's executives toward capitalists and workers, we need only recall that Seth Low was for more than twenty years a Columbia trustee, that he has given his alma mater more than a million dollars, and for many years served as her president.
